

CONVECTION DEFINES CLIMATE ZONES AND WIND PATTERNS

Two models of global wind patterns as predicted by the three-cell theory.
(a) An artist's rendition showing the three cells and the directions of surface winds.
(b) High and low pressure belts with the major convection currents shown on the edges of the sphere.

Each convection loop defines a climate zone: Tropical, Temperate, and Polar. There are three loops instead of one, because of the earth's spin.

Convection Patterns In The Atmosphere Oc:

Atmosphere, Ocean and Climate Dynamics John Marshall, R. Alan Plumb, 1989-11-22 For advanced undergraduate and beginning graduate students in atmospheric oceanic and climate science Atmosphere Ocean and Climate Dynamics is an introductory textbook on the circulations of the atmosphere and ocean and their interaction with an emphasis on global scales It will give students a good grasp of what the atmosphere and oceans look like on the large scale and why they look that way The role of the oceans in climate and paleoclimate is also discussed The combination of observations theory and accompanying illustrative laboratory experiments sets this text apart by making it accessible to students with no prior training in meteorology or oceanography Written at a mathematical level that is appealing for undergraduates and beginning graduate students Provides a useful educational tool through a combination of observations and laboratory demonstrations which can be viewed over the web Contains instructions on how to reproduce the simple but informative laboratory experiments Includes copious problems with sample answers to help students learn the material

Decadal Climate Variability David L.T. Anderson, Jürgen Willebrand, 2013-06-29 On decadal time scales climate change may result not only from man made causes but also from natural processes This book brings together theoretical conceptions of the physical mechanisms of climate change with observational evidence of these changes The following key topics are included Observed Climatic Variability Predictability of the Atmosphere and Oceans from Days to Decades and Mechanisms for Decadal to Centennial Climate Variability Further there are specialised contributions on the role of the oceanic circulation in climate change The authors are renowned for their pedagogical skills and the book is primarily designed for beginners in the field who have a background in physical science In addition it is an invaluable source of information for scientists seeking an overview on climate dynamics
