Convention And Innovation In Literature:

Convention and Innovation in Literature Theo D[un]haen, Rainer Gr[un]bel, Helmut Lethen, 1989-01-01 This work is a critical evaluation of the concepts of convention and innovation as applied in the study of changing literary values hierarchies and canons Two approaches are analyzed 1 the linking of convention and the subject s awareness of convention and 2 systems theory The merits of both approaches are discussed and an attempt is made to combine them and to regard systems of literary communication primarily as systems of conventions Specific cases of changing conventions and innovation are illustrated with examples from the field of versification Rimbaud reception studies Puskin Goethe George Eliot the dichotomy of forgetting remembering Nietzsche Proust avant garde the American dream and popular genres assimilated in Postmodernism Canadian Review of Comparative Literature ,2003 **Comprehensive Dissertation Index: Language & literature, A-L** ,1984 A Study of Selected Alternate Literary Conventions in Fiction for Children and Young Adults and an Examination of the Responses of Professionals Influential in Juvenile Literature to the Presence of These Conventions Wendy Kathleen Sutton,1978 Magical Realism Lois Parkinson Zamora, Wendy B. Faris,1995 Shows magical realism to be an international movement with a wide ranging history **Pushkin's Eugene Onegin** Sally Dalton-Brown,1997 This work of Pushkin s has been called an encyclopaedia of Russian life Presented here is a study of this work aiming to provide an up to date guide to the text and to the critical debate as well as easy to follow readings It explores themes ideas and intricacies of the novel **Words from the West** Erik Z[ur]cher,1993 **Cumulative Book Index** ,1998 A world list of books in the English language **Contemporary Literary Criticism** Jeffrey W. Hunter,2004-11 Covers authors who are currently active or who died after December 31 1959 Profiles novelists poets playwrights and other creative and nonfiction writers by providing criticism taken from books magazines literary reviews newspapers and scholarly journals **Inducing large-scale diffusion of innovation** Ingrid Mignon,2016-09-06 In order for the innovation process to be successful not only do innovations need to be developed and reached the market but once they are available for users they have to spread on a large scale In the innovation literature a complete explanation is lacking of why some innovations reach a phase of large scale diffusion faster than others including both actor and system level components For instance what drives and hinders adopters to decide to adopt the innovation on the actor and system levels and how adopters who participate in the largescale diffusion handle the adoption process and the implementation of the innovation are questions still unanswered As a consequence it remains unclear how the large scale diffusion process can be facilitated and speeded up This thesis addresses these issues by studying the case of renewable electricity RE innovations After decades of technology development and improvements RE innovations are now mature enough to be bought off the shelf by individuals and organizations Yet the pace of their large scale diffusion is still too slow for countries to reach their RE generation targets and to limit global warming Through qualitative and quantitative methods including 59 semi structured interviews with adopters project

developers and experts in Sweden France and Germany as well as a survey sent to the whole population of RE adopters in Sweden an adopter perspective is taken in order to explore the adoption dynamics shaping large scale diffusion of innovation More specifically the thesis identifies the drivers and challenges of adoption during large scale diffusion and their impact on adoption decisions and strategies The outcome of this work is presented in a compiling synthesis and six appended papers Findings show that adopters are heterogeneous with regard to their characteristics as well as to the drivers challenges and strategies that affect their adoption processes Depending on their perceptions some adopters are more influenced by drivers and challenges than others and as a consequence adopters base their adoption decisions on different motives and follow different strategies to implement the innovation Moreover the results suggest that the dynamics that occur during the large scale diffusion process does not only come from the actor level and the level of the system where the largescale diffusion takes place but also from parallel systems which are related to adopters and their contexts including both the social networks and the industries they primarily belong This makes adopters the central drivers of the innovation diffusion process and this distinguishes the dynamics of large scale diffusion from the dynamics of innovation development and early diffusion in which the innovation is the central component Based on the findings about the adoption dynamics shaping large scale diffusion the thesis raises the need to consider large scale diffusion as part of a new system different from the innovation system and that acknowledges the specificities of this process A tentative model accounting for the central role of adopters and for the interactions between adopters the diffusion system and parallel systems is introduced Finally the implications of these findings for policy makers and managers are put forward In particular there is a need for policies acknowledging adopters heterogeneity as well as the new challenges of large scale diffusion Strategies developed by adopters can be a source of inspiration for policy makers who can for instance promote the use of intermediaries of adopters task environment and networks as well as the formation of coalitions among adopters
