## Conventions Of War:

**The 1949 Geneva Conventions** Andrew Clapham, Paola Gaeta, Marco Sassòli, 2015-10-15 The four Geneva Conventions adopted in 1949 remain the fundamental basis of contemporary international humanitarian law They protect the wounded and sick on the battlefield those wounded sick or shipwrecked at sea prisoners of war and civilians in time of war However since they were adopted warfare has changed considerably In this groundbreaking commentary over sixty international law experts investigate the application of the Geneva Conventions and explain how they should be interpreted today It places the Conventions in the light of the developing obligations imposed by international law on states armed groups and individuals most notably through international human rights law and international criminal law The context in which the Conventions are to be applied and interpreted has changed considerably since they were first written The borderline between international and non international armed conflicts is not as clear cut as was once thought and is complicated further by the use of armed force mandated by the United Nations and the complex mixed and transnational nature of certain non international armed conflicts The influence of other developing branches of international law such as human rights law and refugee law has been considerable The development of international criminal law has breathed new life into multiple provisions of the Geneva Conventions This commentary adopts a thematic approach to provide detailed analysis of each key issue dealt with by the Conventions taking into account both judicial decisions and state practice Cross cutting chapters on issues such as transnational conflicts and the geographical scope of the Conventions also give readers a full understanding of the meaning of the Geneva Conventions in their contemporary context Prepared under the auspices of the Geneva Academy of International Humanitarian Law and Human Rights this commentary on four of the most important treaties in international law is unmissable for anyone working in or studying situations of armed conflicts *The Laws of Armed Conflicts* Dietrich Schindler, Jiří Toman, 1973 *The Laws of Armed Conflicts* Dietrich Schindler, Jiri Toman, 2004-04-01 The long awaited fourth edition of this classic collection reproduces the texts of conventions draft conventions and resolutions on the law of armed conflicts which have been adopted since the codification movement started in the nineteenth century Since the previous edition appeared the number of texts has increased due to the rapid development of this branch of international law In order to give the reader access to all conventions and similar texts adopted since the nineteenth century older conventions that in the course of time were replaced by newer ones such as the Geneva Conventions adopted before 1949 have also been reproduced All texts are introduced by a short explanatory note A list of signatures ratifications and accessions as well as the texts of reservations of individual states are attached to each convention The book is fully indexed **Geneva Conventions and Rules of War in the Post 9/11 and Iraq World** Symposium Geneva conventions and rules of war in the post 9/11 and Iraq world, 2005 **Geneva Conventions and Rules of War in the Post 9/11 and Iraq World**, 2005 *Do the Geneva Conventions Matter?* Matthew Evangelista, Nina Tannenwald, 2017-08-17 The Geneva Conventions are the best known and

longest established laws governing warfare but what difference do they make to how states engage in armed conflict Since the start of the War on Terror with 9 11 these protocols have increasingly been incorporated into public discussion We have entered an era where contemporary wars often involve terrorism and guerrilla tactics but how have the rules that were designed for more conventional forms of interstate violence adjusted Do the Geneva Conventions Matter provides a rich comparative analysis of the laws that govern warfare and a more specific investigation relating to state practice Matthew Evangelista and Nina Tannenwald convey the extent and conditions that symbolic or ritual compliance translates into actual compliance on the battlefield by looking at important studies across history To name a few they navigate through the Algerian War for independence from France in the 1950s and 1960s the US wars in Korea Vietnam Iraq and Afghanistan Iranian and Israeli approaches to the laws of war and the legal obligations of private security firms and peacekeeping forces Thoroughly researched this work adds to the law and society literature in sociology the constructivist literature in international relations and legal scholarship on internalization Do the Geneva Conventions Matter gives insight into how the Geneva regime has constrained guerrilla warfare and terrorism and the factors that affect protect human rights in wartime

*The Law of Air Warfare* Natalino Ronzitti (jurist), Gabriella Venturini, 2006 This book is the outcome of a research project directed by Natalino Ronzitti to explore the current status and future prospects of international humanitarian law of air warfare This is achieved through the analysis of international customary law the conventional provisions in force and the most recent State practice As the most recent conflicts suggest air warfare has known an exponential growth However even a rapid analysis of the international humanitarian law applicable to air warfare shows a defective and fragmentary situation This book will fill the current gap that exists in legal literature and will critically review and evaluate recent State practice

**Preparing for War** Boyd van Dijk, 2022 The 1949 Geneva Conventions are the most important rules for armed conflict ever formulated To this day they continue to shape contemporary debates about regulating warfare but their history is often misunderstood For most observers the drafters behind these treaties were primarily motivated by liberal humanitarian principles and the shock of the atrocities of the Second World War This book tells a different story showing how the final text of the Conventions far from being an unabashedly liberal blueprint was the outcome of a series of political struggles among the drafters It also concerned a great deal more than simply recognizing the

shortcomings of international law revealed by the experience of war To understand the politics and ideas of the Conventions drafters is to see them less as passive characters responding to past events than as active protagonists trying to shape the future of warfare In many different ways they tried to define the contours of future battlefields by deciding who deserved protection and what counted as a legitimate target Outlawing illegal conduct in wartime did as much to outline the concept of humanized war as to establish the legality of waging war itself Through extensive archival research and critical legal methodologies *Preparing for War* establishes that although they did not seek war the Conventions drafters prepared for it by means of weaving a new legal safety net in the event that their worst fear should materialize a spectre still haunting us today
