Chiasms Fred Evans, Leonard Lawlor, 2012-02-01 Some of the best interpretations and evaluations of Merleau Ponty's innovative notions of chiasm and flesh are presented here by prominent scholars from the United States and Europe Divided into three sections the book first establishes the notion of the flesh as a consistent concept and unfolds the nuances of flesh that make it a compelling idea The second section adds to the force of this idea by showing how flesh can be extended to phenomena that Merleau Ponty was not able to treat such as the internet and virtual reality and the third offers criticisms of Merleau Ponty from feminist and Levinasian points of view All the essays attest to the fecundity of Merleau Ponty's later thought for such central philosophical issues as the bonds between self others and the world Contributors include Renaud Barbaras Mauro Carbone Edward S Casey Suzanne L Cataldi Tina Chanter Fran oise Dastur Jean Greisch Lawrence Hass Marjorie Hass James Hatley Henri Maldiney Linda Martin Alcoff Bernhard Waldenfels Gail Weiss Hugh J Silverman and Edith Wyschogrod

On the Ethical Philosophy of Edith Stein William E. Tullius, 2024-09-03 Although she never penned a text dedicated exclusively to ethics Edith Stein's work encompasses an implicit but self consciously developed moral philosophy not yet sufficiently developed in the current English language literature However comparison of Stein's anthropological and metaphysical theories against the ethical philosophy of other early phenomenological thinkers such as Max Scheler and Edmund Husserl reveals lines of moral theory woven throughout her texts In *On the Ethical Philosophy of Edith Stein Outlines of Morality* William E Tullius endeavors to present a systematic account of Stein's moral thought as it takes shape in conversation with neo scholasticism and develops across her corpus in conversation with her philosophical anthropology axiological theory and metaphysics The ethics which emerge from these sources is oriented around the moral project of the development of personality through the unfolding of one's personal core and which entails a call to the development of an ethical community reflective of and oriented by its responsiveness to the highest values and to the communal destiny of all humanity in God

Conservative Intellectuals and Richard Nixon S. Mergel, 2010-01-04 *Conservative Intellectuals and Richard Nixon* explores the relationship between postwar conservatives and the president from 1968 to 1974 Seemingly casting those years out of their history conservatives have never fully explored how Richard Nixon affected their movement They fail to realize the extent his presidency helped refocus their fight against liberalism and communism Mergel uses the Nixon years as a window into the Right's effort to turn ideology into successful politics It combines an assessment of Nixon's presidency through the eyes of conservative intellectuals with an attempt to understand what the Right gained from its experience with Nixon

Essays on Gödel's Reception of Leibniz, Husserl, and Brouwer Mark van Atten, 2014-11-21 This volume tackles G del's two stage project of first using Husserl's transcendental phenomenology to reconstruct and develop Leibniz monadology and then founding classical mathematics on the metaphysics thus obtained The author analyses the historical and systematic aspects of that project and then evaluates it with an emphasis on the second stage The book is organised around G del's use of Leibniz Husserl and Brouwer Far from considering past philosophers irrelevant to actual systematic concerns G del embraced the use of historical authors to frame his own philosophical perspective The philosophies of Leibniz and Husserl define his project while Brouwer's intuitionism is its principal foil the close affinities between phenomenology and intuitionism set the bar for G del's attempt to go far beyond intuitionism The four central essays are Monads and sets On the philosophical development of Kurt G del G del and intuitionism and Construction and constitution in mathematics The first analyses and criticises G del's attempt to justify by an argument from analogy with the monadology the reflection principle in set theory It also provides further support for G del's idea that the monadology needs to be reconstructed phenomenologically by showing that the unsupplemented monadology is not able to found mathematics directly The second studies G del's reading of Husserl its relation to Leibniz monadology and its influence on his published writings The third discusses how on various occasions Brouwer's intuitionism actually inspired G del's work in particular the Dialectica Interpretation The fourth addresses the question whether classical mathematics admits of the phenomenological foundation that G del envisaged and concludes that it does not The remaining essays provide further context The essays collected here were written and published over the last decade Notes have been added to record further thoughts changes of mind connections between the essays and updates of references
