About the Book In the tradition of the User's Guides to the Medical Literature and The Rational Clinical Examination JAMA

Care at the Close of Life is based on a widely successful series of articles appearing over the course of the last ten years in JAMA the world's most widely read medical journal. The series is directed by Stephen McPhee, a leading authority of end of life care and the chief editor of our market leading Current Medical Diagnosis and Treatment text. The articles in the series cover fundamental topics and challenges in caring for patients who have been given a terminal diagnosis. Featuring a strong focus on evidence based medicine and organized by clinical cases, the articles are widely read by faculty, medical students and clinicians who frankly have not been given a solid educational experience on this very important medical issue. The book will be physically modeled after The Rational Clinical Examination in a full color format that highlights the clinical cases. It will be well suited for use as a required or recommended textbook for medical PA and NO students and as a clinical reference text for trainees and practicing physicians and nurses.

**Key Selling Features:** Based on highly regarded content from the world's most widely read medical journal. All content is completely updated and extensive new never before published content has been added. Case based and evidence based so it's a perfect fit for the way medical students and residents like to learn. Focuses on practical real world issues for primary care physicians and avoids esoteric issues of interest only to specialists in palliative care. Full color format modeled after the highly regarded Rational Clinical Examination. Includes multimedia materials available on line. Power Point slides for teaching and video interviews with patients in end of life care so that faculty and students get supplemental resources for learning the art and science of care at the end of life. Evidence based guidance from the world's leading medical journal on a critical topic that has been neglected in medical education and training until recently.

**Author Profile:** JAMA is the world's most widely read medical journal and has a reputation for excellence in evidence based medicine. Stephen McPhee has high visibility on account of his editorship of CMDT and for his driving role in enhancing end of life care in medical education and training programs. He is Professor of Medicine, UCSF School of Medicine, San Francisco, CA.

Journal of Palliative Care, 2004      Joint Commission Journal on Quality and Patient Safety, 2007      **Media Review Digest** C Edward Wall, 2005-08      **An Evidence-based Approach to the Treatment and Care of the Older Adult with Cancer** Diane G. Cope, Anne M. Reb, 2006

Description: The book offers a comprehensive overview of the treatment and care of the older adult with cancer. The evidence based practice approach is timely and provides the foundation for nursing practice that is the expected standard of care. The use of the case study at the end of each chapter assists the reader in the synthesis and application of the information. The book addresses every aspect of the care and treatment of not only the cancer patient but also the family. The chapter on complementary therapy is a bonus.

**Purpose:** The purpose is to focus on the unique aspects of treatment and care that the older adult with cancer requires. Addressing the older adult with cancer is of paramount importance to not only the health of the individual but of the family, community and society. The book meets the author's objectives.

**Audience:** This is written for all healthcare providers. The authors have written a book that can be used by geriatric oncology nurses but it is appropriate for the multidisciplinary team that

provides care to the older adult with cancer The authors have the professional background with applicable experience to edit this book Features This book covers more than the care and treatment of cancer in the older adult It provides necessary background information that demonstrates the impact of cancer on the older patient and their significant others The assessment information is useful for both experienced and novice nurses The use of chapter case studies enables healthcare providers to apply the chapter content The use of an evidence based practice approach to delivering healthcare is essential The information allows nurses to use the findings from reviewed research literature in providing the best care for their patients in an efficient manner that also considers patient preferences the risks and the benefits of treatment or lack thereof Assessment This book provides guidance to novice to expert nurses in the treatment and care of the older adult cancer patient using a holistic approach The chapters are well written by authors who are experts in their field The Cochrane Guidelines are considered the gold standard for evaluating research that impacts treatment selection and care of all patients Their use in the reference materials lends credibility to the information that is presented in the book Publisher **The Nursing Experience: Trends, Challenges, and Transitions, Fifth Edition** Lucille A.
