## Cook Is The Captain:

**Captain Cook's Journal** James Cook, 2015-04-09 Captain Cook's Journal from James Cook British explorer navigator cartographer and captain in the Royal Navy 1728 1779 Captain James Cook Richard Hough, 1995 This meticulous narrative captures an age of discovery and establishes Cook as a link between the vague scientific speculations of the 18th century and the industrial revolution to come Includes an interesting new element is medical evidence that may explain Cook's strange behavior on his final voyage *The Voyages of Captain James Cook* James Cook, John Hawkesworth, Georg Forster, James King, 2016-11-01 The first ever illustrated account of the explorer and cartographer's epic eighteenth century Pacific voyages complete with excerpts from his journals This is history's greatest adventure story In 1766 the Royal Society chose prodigal mapmaker and navigator James Cook to lead a South Pacific voyage His orders were to chart the path of Venus across the sun That task completed his ship the HMS Endeavour continued to comb the southern hemisphere for the imagined continent Terra Australis The voyage lasted from 1768 to 1771 and upon Cook's return to London his journaled accounts of the expedition made him a celebrity After that came two more voyages for Cook and his crew followed by Cook's murder by natives in Hawaii The Voyages of Captain James Cook reveals Cook's fascinating story through journal excerpts illustrations photography and supplementary writings During Cook's career he logged more than 200 000 miles nearly the distance to the moon And along the way scientists and artists traveling with him documented exotic flora and fauna untouched landscapes indigenous peoples and much more In addition to the South Pacific Cook's voyages took him to South America Antarctica New Zealand the Pacific Coast from California to Alaska the Arctic Circle Siberia the East Indies and the Indian Ocean When he set out in 1768 more than one third of the globe was unmapped By the time Cook died in 1779 he had created charts so accurate that some were used into the 1990s The Voyages of Captain James Cook is a handsome illustrated edition of Cook's selected writings spanning his Pacific voyages ending in 1779 with the delivery of his salted scalp and hands to his surviving crewmembers It's an enthralling read for anyone who appreciates history science art and classic adventure The Death of Captain Cook Gavin Kennedy, 1978 *In Search of Captain Cook* Dan O'Sullivan, 2008-03-30 Captain James Cook was the greatest explorer of his age perhaps of any age He was a leader of men a master voyager who journeyed to unknown places a seeker of knowledge who commanded three demanding scientific expeditions He and his crews had encounters with peoples of the South Seas which could lead to mutual respect and trade but also to misunderstanding and violence Even before he died his exploits were widely admired But his death at the hands of Hawaiians turned him into a legendary figure a hero of the Enlightenment who was said to have brought civilization to the Pacific while giving up his own life in the process Yet despite everything that is known about Cook's life and many adventures the man himself remains shrouded in mystery With this book Dan O'Sullivan seeks to put this right and casts vivid light on Cook's character teasing out his personality from the pages of his own journals As well as an original and illuminating re

examination of Cook's complex character this is also a vivid introduction to his life and times which is essential reading for anyone with an interest in this incomparable sea captain      The Journals of Captain Cook Captain James Cook, 2003-09-25

Cook led three famous expeditions to the Pacific Ocean between 1768 and 1779. In voyages that ranged from the Antarctic circle to the Arctic Sea, Cook charted Australia and the whole coast of New Zealand and brought back detailed descriptions of the natural history of the Pacific. Accounts based on Cook's journals were issued at the time, but it was not until this century that the original journals were published in Beaglehole's definitive edition. The JOURNALS tells the story of these voyages as Cook wanted it to be told, radiating the ambition, courage and skill which enabled him to carry out an unrivalled series of expeditions in dangerous waters.

**A Voyage Towards the South Pole and Round the World** James Cook, 2015-12-28

1772 April I sailed from Deptford April 9th 1772 but got no farther than Woolwich where I was detained by easterly winds till the 23d when the ship fell down to Long Reach and the next day was joined by the Adventure. Here both ships received on board their powder, guns, gunners, stores and marines. 1772 May On the 10th of May we left Long Reach with orders to touch at Plymouth but in plying down the river the Resolution was found to be very crank which made it necessary to put into Sheerness in order to remove this evil by making some alteration in her upper works. These the officers of the yard were ordered to take in hand immediately and Lord Sandwich and Sir Hugh Palliser came down to see them executed in such a manner as might effectually answer the purpose intended. 1772 June On the 22d of June the ship was again completed for sea when I sailed from Sheerness and on the 3d of July joined the Adventure in Plymouth Sound. The evening before we met off the Sound Lord Sandwich in the Augusta yacht who was on his return from visiting the several dock yards with the Glory frigate and Hazard sloop. We saluted his lordship with seventeen guns and soon after he and Sir Hugh Palliser gave us the last mark of the very great attention they had paid to this equipment by coming on board to satisfy themselves that every thing was done to my wish and that the ship was found to answer to my satisfaction. At Plymouth I received my instructions dated the 25th of June directing me to take under my command the Adventure to make the best of my way to the island of Madeira there to take in a supply of wine and then proceed to the Cape of Good Hope where I was to refresh the ship's companies and to take on board such provisions and necessaries as I might stand in need of. After leaving the Cape of Good Hope I was to proceed to the southward and endeavour to fall in with Cape Circumcision which was said by Monsieur Bouvet to lie in the latitude of 54° S and in about 11° 20' E longitude from Greenwich. If I discovered this cape I was to satisfy myself whether it was a part of the continent which had so much engaged the attention of geographers and former navigators or a part of an island. If it proved to be the former I

was to employ myself diligently in exploring as great an extent of it as I could and to make such notations thereon and observations of every kind as might be useful either to navigation or commerce or tend to the promotion of natural knowledge I was also directed to observe the genius temper disposition and number of the inhabitants if there were any and endeavour by all proper means to cultivate a friendship and alliance with them making them presents of such things as they might value inviting them to traffic and shewing them every kind of civility and regard I was to continue to employ myself on this service and making discoveries either to the eastward or westward as my situation might render most eligible keeping in as high a latitude as I could and prosecuting my discoveries as near to the South Pole as possible so long as the condition of the ships the health of their crews and the state of their provisions would admit of taking care to reserve as much of the latter as would enable me to reach some known port where I was to procure a sufficiency to bring me home to England But if Cape Circumcision should prove to be part of an island only or if I should not be able to find the said Cape I was in the first case to make the necessary survey of the island and then to stand on to the southward so long as I judged there was a likelihood of falling in with the continent which I was also to do in the latter case and then to proceed to the eastward in further search of the said continent as well as to make discoveries of such islands as might be situated in that unexplored part of the southern hemisphere keeping in high latitudes and prosecuting my discoveries as above mentioned as near the pole as possible until I had circumnavigated the globe after which I was to proceed to the Cape of Good Hope and from thence to Spithead

[The Life of Captain James Cook](#) Arthur Kitson, 2015-12-28 James Cook the Circumnavigator was a native of the district of Cleveland Yorkshire but of his ancestry there is now very little satisfactory information to be obtained Nichols in his Topographer and Genealogist suggests that James Cooke the celebrated mariner was probably of common origin with the Stockton Cookes His reason for the suggestion being that a branch of the family possessed a crayon portrait of some relation which was supposed to resemble the great discoverer He makes no explanation of the difference in spelling of the two names and admits that the sailor's family was said to come from Scotland Dr George Young certainly the most reliable authority on Cook's early years who published a Life in 1836 went to Whitby as Vicar about 1805 and claims to have obtained much information about his subject through intercourse with his relatives friends and acquaintances including one or two surviving school companions and appears to be satisfied that Cook was of Scotch extraction Dr George Johnston a very careful writer states in his Natural History of the Eastern Borders that in 1692 the father of James Thomson the author of The Seasons was minister of Ednam Roxburghshire and a man named John Cook was one of the Elders of the Kirk This John Cook married on the 19th January 1693 a woman named Jean Duncan by whom he had a son James baptised 4th March 1694 and this child Johnston positively asserts was afterwards the father of the future

Captain Cook The dates of the marriage and baptism have been verified by the Reverend John Burleigh minister of Ednam and they agree with the probable date of the birth of Cook s father for he died in 1778 at the age of eighty five Owing to the loss of the church records for some years after 1698 Mr Burleigh is unable to trace when this James Cook left Ednam to better himself but he would take with him a testificate of church membership which might possibly but not probably still exist Attracted perhaps by the number of Scotch people who flocked into the north of Yorkshire to follow the alum trade then at its height James Cook settled down and married and the first positive information to be obtained is that he and his wife Grace her maiden name has so far escaped identification though she is known to have been a native of Cleveland resided for some time at Morton in the parish of Ormsby and here their eldest child John was born in January 1727 Dr Young says that James Cook had a superstition that his mother s farewell was prophetic of his marriage for her words were God send you Grace

The Voyages of Captain Cook James Cook,1999 Cook s three voyages of discovery which took place between 1768 and 1779 are among the most remarkable achievements in the history of exploration Cook charted vast areas of the globe with astonishing accuracy and the voyages also made a significant contribution towards solving some of the great problems of cartography and navigation With crews containing gifted sailors and navigators as well as botanists painters and scientists Cook provides the link between the speculative profit hungry voyages of the Elizabethan seafarers and the scientific expeditions of the nineteenth and twentieth centuries **Captain Cook's voyage of discovery** Captain Cook,1906
