Perspectives Chandni Basu, Vicky Anderson-Patton, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2013 Concerns about children and childhood have emerged as part of public debate and discourse in the second half of the twentieth century Theoretical discourse surrounding childhood has been complimented by various development initiatives taken in different parts of the world and research has emerged as an important component of this focus which would carry forward the intellectual and other engagements concerning children and childhood This volume brings together diverse theoretical and practical deliberations on children and childhood from various parts of the world It explores conceptual understandings of childhood extending from historical perspectives to extreme expressions of negativity like childism An historical perspective illuminates the image and imagination of the child in various art forms The constructed connotation of childhood is portrayed through its cultural comparisons The close connection of childhood and institutions is explored through the projection and presence of children in schools and legal structures *The Handbook of Educational Theories* Beverly Irby, Genevieve H. Brown, Rafael Lara-Alecio, Dr. Shirley A. Jackson, 2013-03-01 Although educational theories are presented in a variety of textbooks and in some discipline specific handbooks and encyclopedias no publication exists which

serves as a comprehensive consolidated collection of the most influential and most frequently quoted and consulted theories. There is a need to put such theories into a single easily accessible volume. A unique feature of the Handbook is the way in which it conveys the theories. The organization of the chapters within each section makes the volume an easy to use and understandable reference tool as researchers and practitioners seek theories to guide their research and practice and as they develop theoretical frameworks. In addition to the traditional theories presented, the Handbook includes emerging theories for the 21st Century as well as presenting practical examples of the use of these theories in research from dissertations and published articles. An appendix which indicates which theories have instruments associated with them and where those instruments can be found is also included. The Handbook consists of 12 sections. Section I provides the introduction with a focus on what constitutes good theory as well as how theory guides research and practice. The remaining sections address Philosophical Educational Constructs, Learning Theory, Instructional Theory, Curriculum theory, Literacy and Language Acquisition Theory, Counseling Theory, Moral Development Theory, Classroom Management Theory, Assessment Theory, Organizational Theory, and Leadership Management Theory. Each section consists of an overview written by the section editor of the general theoretical concepts to be addressed by the chapter authors. Each chapter within the section will include: a description of the theory with goals, assumptions, and aspects particular to the theory; b) the original development of and interactions of the theory; c) validation of the theory; d) generalizability of the theory across cultures, ethnicities, and genders; e) the use and application of the theory; f) critiques of the theory; g) any instruments associated with the theory; and h) two to five particular studies exemplifying particular theories as individuals have used them in theoretical framework of dissertations or published articles, and be written by the original theorist or prominent contributors to the theory. The Handbook is intended for graduate students enrolled in research courses or completing theses and dissertations. Additionally, professors of all educational disciplines in the social sciences would be an interested audience. There is also potential use of the text as administrators, counselors, and teachers in schools use theory to guide practice. As more inquiry is being promoted among school leaders, this book has more meaning for practitioners.
