Copenhagen Open Spaces Peter Olesen, 1990      **Regional Planning for Open Space** Arnold van der Valk, Terry van Dijk, 2009-06-24 Reviewing the limitations of various planning options this book addresses the debate on how to preserve open space in the context of a growing metropolis The importance of open spaces for well being in urban life is well established With case studies on internalization and valuation methods this book critically examines the liberal discourse that urges the transfer of responsibility for open space from government to the market European and American expert authors confront political rhetoric with grounded analysis and conclude that the market needs to be combined with governmental efforts They scrutinize the connection between open space and the planning institutions designed to implement its policy The book provides practical pieces of insight in how to structure an open space problem information on what to expect from instruments and new ideas on alternative approaches      *Open Space: People Space* Catharine Ward Thompson, Penny Travlou, 2007-09-07 Highly visual and containing contributions from leading names in landscape architecture and design this volume provides a rare insight into people s engagement with the outdoor environment looking at the ways in which the design of spaces and places meets people s needs and desires in the twenty first century Embracing issues of social inclusion recreation and environmental quality the editors explore innovative ways to develop an understanding of how the landscape urban or rural can contribute to health and quality of life *Open Space People Space* examines the nature and value of people s access to outdoor environments Led by Edinburgh s OPENspace research centre the debate focuses on current research to support good design for open space and brings expertise from a range of disciplines to look at an analysis of policy and planning issues and challenges understanding the nature and experience of exclusion the development of evidence based inclusive design innovative research approaches which focus on people s access to open space and the implications of that experience Invaluable to policy makers researchers urban designers landscape architects planners managers and students it is also essential reading for those working in child development health care and community development      *KØBENHAVN. spaces On the other hand local authorities have started to involve citizens in the governance of urban green spaces While an increased level of citizen participation and conducive conditions for citizens self organisation are a desirable development per se the risk of functionalising civil society actors by the local authority for neoliberal city development must be kept in mind Drawing on qualitative and quantitative data collected in 29 European cities from all four European geographic regions this book examines the governance of urban green spaces and urban food production focusing on the contribution of citizen driven activities Over the course of the book Schicklinski identifies best practice examples of successful collaboration between citizens and local government The book concludes with policy recommendations with great practical value for local governance in European cities in times of the growth turn This book will be of great relevance to students scholars and policy makers with an interest in environmental governance urban geography and sustainable development **Open Spaces** Mary
