BESTSELLER Artificial intelligence is going to have a massive impact on everyone's lives an accessible and sensible read that  
helps demystify AI Deborah Meaden entrepreneur and star of Dragon's Den Nigel Toon is a visionary leader in the field of  
artificial intelligence a must read Marc Tremblay Distinguished Engineer Microsoft Those who understand how AI thinks are  
about to win big We are used to thinking of computers as being a step up from calculators very good at storing information  
and maybe even at playing a logical game like chess But up to now they haven't been able to think in ways that are intuitive  
or respond to questions as a human might All that has changed dramatically in the past few years Our search engines are  
becoming answer engines Artificial intelligence is already revolutionising sectors from education to healthcare to the creative

arts But how does an AI understand sentiment or context How does it play and win games that have an almost infinite number of moves And how can we work with AI to produce insights and innovations that are beyond human capacity from writing code in an instant to unfolding the elaborate 3D puzzles of proteins We stand at the brink of a historic change that will disrupt society and at the same time create enormous opportunities for those who understand how AI thinks Nigel Toon shows how we train AI to train itself so that it can paint images that have never existed before or converse in any language In doing so he reveals the strange and fascinating ways that humans think too as we learn how to live in a world shared by machine intelligences of our own creation

2014 The solo exhibition Ai Weiwei absent at Taipei Fine Arts Museum TFAM is the artist's first large scale solo exhibition to be held anywhere in the ethnic Chinese world The museum presents the exhibition to convey Ai Weiwei's dynamic works of arts his ideas and influential power to audience Ai Weiwei absent presents 21 sets of artwork spanning a period from 1980s to 2011 encompassing a variety of forms such as installation and video and using a variety of materials such as ceramics marble antique utensils and bicycles It also includes a series of over 100 photographic works 75 of which were taken by the artist during his stay in New York between 1983 and 1993 while the other 25 pieces were shot after he

moved back Beijing East Village in 1993 The artist s most recent work Forever Bicycles created specially for this exhibition is composed of 1 200 bicycles and installed in an exhibition space 10 meters high Bicycles have long been the most common means of transport in China and as such are both familiar and intimate but Ai Weiwei strips away the functionality of the object He takes his own sensitivity and preferences and through them expands the idea of using finished objects The use of 1 200 bikes and the large structure of the work were particular challenges in the construction of the piece In addition as the bikes are piled layer upon layer on top of each other their wheel axles are transformed to form a labyrinthine like space Visitors can appreciate and reflect on the aesthetics of the abstract shapes from different angles at the same time feeling first hand the work s great energy and appeal Date October 29 2011 January 29 2012      **Modernisation of Chinese Culture**

Jana S. Rošker, Nataša Vampelj Suhadolnik, 2013 The editors are grateful to the Chiang Ching kuo Foundation for its generous support of their research work which enabled them to publish the present book The present book carefully maps the Chinese modernisation discourse highlighting its relationship to other similar discourses and situating it within historical and theoretical contexts In contrast to the majority of recent discussions of a oeChinese development model that tend to focus more on institutional then cultural factors and are more narrowly concerned with economic matters than overall social development the book offers several important focal points for many presently overlooked issues and dilemmas The multifaceted perspectives contained in this anthology are not limited to economic social and ecological issues but also include political and social functions of ideologies and cultural conditioned values representing the axial epistemological grounds of modern Chinese society 2011 was the 100th anniversary of the Xinhai Revolution The centennial is relevant not only in terms of state ideology but also plays a significant role within academic research into Chinese society and culture This historic turning point likewise represents the symbolic and concrete linkages and tensions between tradition and modernity progress and conservatism traditional values and the demands for adjustment to contemporary societies The book shows that Chinese transition from tradition to modernity cannot be understood in a framework of a unified general model of society but rather through a more complex insight into the interrelations among elements of physical environment social structure philosophy history and culture      Britannica Book of the Year ,2012      **Poets & Writers** ,2006      Who's who in America
