the speech processing industry The fact that I would be writing the foreword with Bill Scholz made the job even more enjoyable Bill and I have known each other since he was at UNISYS directing projects that had a profound impact on speech recognition tools and applications Bill Scholz The opportunity to prepare this foreword with Judith provides me with a rare opportunity to collaborate with a seasoned speech professional to identify numerous significant contributions to the field offered by the contributors whom Amy has recruited Judith and I have had our eyes opened by the ideas and analyses offered by this collection of authors Speech recognition no longer needs be relegated to the category of an experimental future technology it is here today with sufficient capability to address the most challenging of tasks And the point click type approach to GUI control is no longer sufficient especially in the context of limitations of mode day hand held devices Instead VUI and GUI are being integrated into unified multimodal solutions that are maturing into the fundamental paradigm for computer human interaction in the future
