Research Handbook on Human Resource Management and Disruptive Technologies Tanya Bondarouk,Jeroen Meijerink,2024-03-14 This comprehensive and judicious Research Handbook examines the fundamental influence of the emergence of contemporary disruptive technologies including artificial intelligence online platforms the internet of things and social robots on Human Resource Management HRM

Post-Growth Work Irmi Seidl,Angelika Zahrt,2021-09-08 This book argues that society must rethink the notion of formal employment and instead introduce and spread the notion of meaningful work so that societies can become independent of economic growth The excessive consumption of natural resources and the immense emissions resulting from our growth oriented economic system surpass the planetary boundaries Despite this society and the economy still strive for economic growth in order to generate jobs to finance the social security system and to assure tax income However these expectations are increasingly unrealistic not least because technological developments such as digitalisation and robotisation will change and limit formal employment opportunities as well Against this backdrop the book introduces the notion of meaningful activities that embrace various kinds of work paid and unpaid sequential or in parallel which are meaningful for the worker as well as society as a whole At the same time the authors argue in favour of reduced working time in formal employment Furthermore the book also describes the necessary transformations in companies and for consumers for social and tax systems for social services and agriculture Innovative and timely this book will be a key resource for professionals and scholars interested in sustainability economics work transformation and post growth studies

Will Robots Take Your Job?: A Plea for Consensus Nigel M. de S. Cameron, 2017-06-23 The trend that began with ATMs and do it yourself checkouts is moving at lightning speed Everything from driving to teaching to the care of the elderly and indeed code writing can now be done by smart machines Conventional wisdom says there will be new jobs to replace those we lose but is it so simple And are we ready Technology writer and think tank director Nigel Cameron argues it's naive to believe we face a smooth transition Whether or not there are new jobs we face massive disruption as the jobs millions of us are doing get outsourced to machines A twenty first century rust belt will rapidly corrode the labor market and affect literally hundreds of different kinds of jobs simultaneously Robots won't design our future we will Yet shockingly political leaders and policy makers don't seem to have this in their line of sight So how should we assess and prepare for the risks of this unknown future
