The need for a new outlook is propelled by fundamental changes that touch upon environmental, economic and social aspects. The depletion of non renewable natural resources and climate change are a few of the environmental challenges. Increasing costs of material, labor, land and infrastructure have posed economic challenges with affordability being paramount among them. Social challenges are also drawing the attention of designers, builders and homeowners. Walkable communities, aging in place and multigenerational living are some of the concepts considered. In addition, live work environments have become part of the economic reality for those who wish to work from home, which has become possible through digital advances.
