Artificial Intelligence for Education Mario Allegra, Manuel Gentile, Giuseppe Città, Frank Dignum, Iza Marfisi-Schottman, 2023-11-27 What learning teaching and education will be in the next future is an open question Nevertheless believing that an increasing prevalence of AI may not influence the education field seems objectively unlikely In recent years the new renaissance of AI has stimulated discussion on how advances in AI can influence the educational sector and the future educational policies and the impact of AI on Technology Enhanced Learning TEL On the other side the attention of the education sector in artificial intelligence is complemented by the consideration that since the early days of AI researchers have shown for the education sector which has often seen education as one of the preferred application areas The interaction between the AI and TEL research fields led to the investigation of how the advance in AI could support the development of flexible inclusive personalized engaging and effective learning tools Besides research in this area could be a powerful tool to open the learning black box by providing a deeper understanding of how learning occurs The proposed Research Topic aims to gather contributions that provide a comprehensive picture of how AI is changing educational practices and how the key stakeholders in the educational community i e students teachers faculty and families perceive this ongoing change Relevant topics include but are not limited to AI applications in real world educational settings Intelligent Tutoring Systems Adaptive learning environments Learning design and AI Students profiling definition of the student model and ethical implications Intelligent techniques for objective and integrated students evaluation in TEL Teachers competencies for effective integration of AI into Education Teachers perceptions of AI prejudices and attitudes The role of cognitive architectures in Education Serious games and AI Social robotics in Education

Surveillance Education Nolan Higdon, Allison Butler, 2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers

administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education
