Logo Design Josh Cooper, 2017-06-05 We must understand the primary purpose of logos: firstly, to understand what a logo is. The aim of the design process is to make the logo immediately recognizable. The logo is one aspect of the commercial brand of any company or even economic entity. Is it standing out or simply fading into the background? Does it successfully identify your brand or confusing enough to mix up with your competitors? During the research and design phase, these are all quality critical questions to ask. Only a smattering of the main ingredients far from the only ones is needed to create a successful logo. Too many websites today are still inaccessible. In our new book, we have explored crafting the process for flexible design patterns and how to make accessible interfaces without extra effort. In the first half of this book, authors Sean Adams and Noreen Morioka walk readers step by step through the entire logo development process. Topics include developing a concept that communicates the right message and is appropriate for both the client and the market; defining how the client's long-term goals might affect the look and needs of the mark; choosing colors and typefaces; avoiding common mistakes; and deciphering why some logos are successful whereas others are not.
