*AI in Marketing, Sales and Service* Peter Gentsch, 2018-10-22 AI and Algorithmics have already optimized and automated production and logistics processes. Now it is time to unleash AI on the administrative planning and even creative procedures in marketing, sales and management. This book provides an easy-to-understand guide to assessing the value and potential of AI and Algorithmics. It systematically draws together the technologies and methods of AI with clear business scenarios on an entrepreneurial level. With interviews and case studies from those cutting-edge businesses and executives who are already leading the way, this book shows you how customer and market potential can be automatically identified and profiled, how media planning can be intelligently automated and optimized with AI and Big Data, how chat bots and digital assistants can make communication between companies and consumers more efficient and smarter, how you can optimize Customer Journeys based on Algorithmics and AI, and how to conduct market research in a more efficient and smarter way. A decade from now, all businesses will be AI businesses. Gentsch shows you how to make sure yours makes that transition better than your competitors.

**Artificial Intelligence and Industry 4.0** Aboul Ella Hassanien, Jyotir Moy Chatterjee, Vishal Jain, 2022-08-14 Artificial Intelligence and Industry 4.0 explores recent advancements in blockchain technology and artificial intelligence (AI) as well as their crucial impacts on realizing Industry 4.0 goals. The book explores AI applications in industry, including Internet of Things (IoT) and Industrial Internet of Things (IIoT) technology. Chapters explore how AI, machine learning, smart cities, healthcare, Society 5.0, etc. have numerous potential applications in the Industry 4.0 era. This book is a useful resource for researchers and graduate students in computer science, researching and developing AI and the IIoT. Explores artificial intelligence applications within the industrial manufacturing and communications sectors. Presents a wide range of machine learning, computer vision, and digital twin applications across the IoT sector. Explores how deep learning and cognitive computing tools enable processing vast data sets, precise and comprehensive forecast of risks, and delivering recommended actions.
