Indigenous Teaching Disciplines and Perspectives for Higher Education Kgari-Masondo, Maserole Christina, 2025-03-28

Literature indicates that sociolinguists and educationists often claim multilingual practice and Africanizing and Indigenizing education will jeopardize national unity and social cohesion. Such claims delay the implementation of decolonization policies and the transformation of the curriculum under false assumptions. However, research reveals many Indigenous students struggle with higher educational content which is often presented through languages that are unfamiliar to them. This implies that there is a need to uncover resources that can assist in necessitating the implementation of Indigenous education globally and that all multilingual strategies in education must be based on quality mother tongue illustrative content as its foundation. As a result, further research on the subject is necessary to enhance teaching strategies that reach all Indigenous students. *Indigenous Teaching Disciplines and Perspectives for Higher Education* illustrates the need for the implementation of a decolonized teaching and learning curriculum with integrated resources as models. It explores how to improve Indigenous knowledge content and teaching methods. Covering topics such as cultural identity, African research methodology, and Indigenous media, this book is an excellent resource for teachers, policymakers, school administrators, researchers, scholars, academicians, and more.

Managing Innovation Inside Universities Randolph Hall, 2024-06-10. This book offers guidance on capturing the creative forces of the faculty staff and students at universities. Given their unique and central role in America and the world, it examines how university research, learning, and service can be integrated to address the needs of society as it is both enabled and changed by technology. In turn, the book assesses the challenges and opportunities for universities to be more successful and impactful through innovation, viewing universities as integrated systems. It demonstrates how change can occur both within the knowledge economy and because of innovations within it. In doing so, the book provides insights into how universities can prosper and lead in a world that is constantly changed by the innovations that universities and industry jointly create. The book serves as a guide for higher education policymakers, funders, donors, board members, stakeholders, and leaders: chairs, deans, provosts, presidents, through its systematic vision for university innovation and service to society. It will also benefit researchers studying innovation in organizations, illustrating how systematic approaches arising from management science and operations research can be used toward positive change. Lastly, strategic partners in industry, government, and foundations seeking opportunities for partnerships and collaboration with universities will also find it useful.
