## **Conservation Of 20th Century Buildings:**

*Twentieth-century Architectural Heritage* Council of Europe, 1994-01-01

## **Twentieth-Century Building Materials**

Thomas C. Jester, 2014-08-01 Over the concluding decades of the twentieth century the historic preservation community increasingly turned its attention to modern buildings including bungalows from the 1930s gas stations and diners from the 1940s and office buildings and architectural homes from the 1950s Conservation efforts however were often hampered by a lack of technical information about the products used in these structures and to fill this gap *Twentieth Century Building Materials* was developed by the U S Department of the Interior s National Park Service and first published in 1995 Now this invaluable guide is being reissued with a new preface by the book s original editor With more than 250 illustrations including a full color photographic essay the volume remains an indispensable reference on the history and conservation of modern building materials Thirty seven essays written by leading experts offer insights into the history manufacturing processes and uses of a wide range of materials including glass block aluminum plywood linoleum and gypsum board Readers will also learn about how these materials perform over time and discover valuable conservation and repair techniques Bibliographies and sources for further research complete the volume The book is intended for a wide range of conservation professionals including architects engineers conservators and material scientists engaged in the conservation of modern buildings as well as scholars in related disciplines

## **Planned Conservation of 20th-century Architecture**

Davide Del Curto, Simona Salvo, 2024-09-30 This book deals with the planned conservation of modern architecture and proposes a comparative discussion between eight research programs recently completed in Italy and Brazil as part of the Keeping It Modern program by means of which the Getty Foundation supported the drafting of conservation management planning for major architectural masterpieces of the twentieth century worldwide between 2014 and 2020 The scientific results of this program are maturing and also resulting in publications promoted by universities and research centers involved by the Getty Foundation Within this framework of initiatives we dedicate this book to the comparison among research projects carried out in Italy and Brazil starting from the distinctive characteristics that modern architecture has gained in the two countries and evaluating the impact that the Conservation Management Plans on the cultural scenario of each country and on the corresponding protection systems We asked the co authors to reconsider the research experience faced within the KIM program overcoming their description and proposed to describe its specific reflection on the role that management plans play for twentieth century architecture and on how the outcomes of this experience have contributed to the debate on the protection of contemporary architecture Finally the book presents many transversal topics and highlights numerous similarities in approach between the two countries but also profound differences in the way of understanding conservation of twentieth century architectural heritage

## **Conserving 20th-Century Architecture**

Maria Paola Borgarino, Davide Del Curto, 2023-03-30 This book offers an international overview of how to apply the Conservation Management Plan CMP to the

20th century architectural heritage Although the CMP is universally considered a fundamental tool for sustainable management of the built heritage the application to 20th century buildings is still limited The book illustrates selected case studies from different countries to discuss how best to preserve the authenticity of the original materials manage changes in use engage users and stakeholders in this process and make conservation and sustainability work together Conserving 20th century architecture will provide insights for scholars and students and assist architects in drafting an effective conservation management plan *Structure and Style* Michael Stratton,1997 This book looks at approaches to appraising and conserving mainstream architecture of the 20th century commercial buildings industrial buildings and housing Time Frames Ugo Carughi,Massimo Visone,2017-04-28 11 Post tradition in Japanese culture Heritage 12 Industrial architecture 13 Landscape architecture 14 Middle class housing Memory 15 Cultural institutions 16 Architectural photography Conservation 17 Laws and regulations 18 Technology Economy 19 Economic analysis Index of places Index of names **Preserving Post-war Heritage** Susan Macdonald,2001 Since 1990 more than 300 post war buildings and outdoor sculptures have been added to the statutory list of buildings of special architectural or historic interest The debate continues as to whether the design rationale materials used or construction techniques places these buildings outside the scope of normal conservation principles This work examines the specific management and practical issues posed by our post war heritage Contributions from local and international practitioners carrying out pioneering work in their respective areas of expertise cover the most urgent practical problems commonly encountered by conservation professionals who have to deal with post war construction Part I deals with the historical context and the framework for protection of post war architecture in Britain Part II examines structural issues materials and services with particular emphasis on diagnosis and assessment of problems and the options for repair The topics covered include reinforced concrete plastics services clad frame construction and curtain walling La conservazione delle policromie nell'architettura del XX secolo Giacinta Jean,2013 **Contemporary Approaches in Urbanism and Heritage Studies** Rokhsaneh Rahbarianyazd , Editor,2021-08-01 This book is an intellectual discourse and a concise compendium of current research in Architecture and Urbanism Primarily it is a book of readings of 24 chapters The book brings together theories manifestos and methodologies on contemporary architecture and urbanism to raise the understanding for the future of architecture and urban planning Overall the book aimed to establish a bridge between theory and practice in the built environment Thus it reports on the latest research findings and innovative approaches methodologies for creating assessing and understanding of contemporary built environment **The Twentieth-Century Heritage Thematic Framework** Susan Marsden,Peter Spearritt,Leo Schmidt,Sheridan Burke,Gail Ostergren,Jeffrey W. Cody,Chandler McCoy,2021-01-31 The Twentieth Century Historic Thematic Framework is a tool for identifying and assessing the heritage of the twentieth century It is a way to organize and define history in order to help identify heritage sites and place them in context It is not a history of the twentieth century nor is it a database of significant sites but instead

is an analysis of the century's development emphasizing global forces, trends and phenomena that shaped the built environment. Commissioned by the Getty Conservation Institute (GCI) working in collaboration with the ICOMOS Twentieth Century Heritage International Scientific Committee, it identifies the principal social, technological, political and economic drivers that shaped the buildings, cities, industries and landscapes of the twentieth century globally. These have been distilled into ten succinct themes: 1. Rapid Urbanization and the Growth of Large Cities; 2. Accelerated Scientific and Technological Development; 3. Mechanized and Industrialized Agriculture; 4. World Trade and Global Corporations; 5. Transportation Systems and Mass Communication; 6. Internationalization, New Nation States and Human Rights; 7. Conserving the Natural Environment, Buildings and Landscapes; 8. Popular Culture and Tourism; 9. Religious, Educational and Cultural Institutions; 10. War and its Aftermath. The Twentieth Century Historic Thematic Framework is offered freely for use, trial, debate and discussion to support the conservation of significant heritage places of the twentieth century. It is a tool that can be utilized and adapted by anyone involved in heritage conservation around the world. Our hope is that it will aid many forms of research, analysis and survey work and ultimately help sustain and conserve the heritage of the twentieth century.

Twentieth-century Building Materials Thomas C. Jester, 1995      The Conservation Movement Miles Glendinning, 2013 Winner of the 2016 Antoinette Forrester Downing Award presented by the Society of Architectural Historians. In many cities across the world, particularly in Europe, old buildings form a prominent part of the built environment and we often take it for granted that their contribution is intrinsically positive. How has that widely shared belief come about and is its continued general acceptance inevitable? Certainly, ancient structures have long been treated with care and reverence in many societies, including classical Rome and Greece. But only in modern Europe and America in the last two centuries has this care been elaborated and energised into a forceful dynamic ideology: a Conservation Movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of Enlightenment modernity. The close inter-relationship between conservation and modern civilisation was most dramatically heightened in periods of war or social upheaval, beginning with the French Revolution and rising to a tragic climax in the 20th century age of totalitarian extremism. More recently, the troubled relationship of heritage and global commercialism has become dominant. Miles Glendinning's new book authoritatively presents for the first time the entire history of this architectural Conservation Movement and traces its dramatic fluctuations in ideas and popularity, ending by questioning whether its recent international ascendancy can last indefinitely.

Conservation of Modern Architecture Susan Macdonald, Kyle C. Normandin, Bob Kindred, 2015-12-08. The importance of protecting significant buildings from decay and destruction would seem to be undeniable. Yet whilst the majority of buildings of merit constructed before the Second World War have been highlighted as worthy of protection, there is much indifference and in some cases hostility towards many important post-war buildings. These deserve to receive wider formal recognition but in many cases continue to be mistreated or even demolished. This book examines many of the philosophical and practical

issues surrounding the conservation of modern buildings and also the problems faced by building practitioners in dealing with buildings constructed in a wider range of styles and materials than at any other time Climate change in particular has forced change in the way in which we think about buildings with the pressures to address issues of energy efficiency becoming more urgent and likely to have consequences that may alter the perceived architectural and historic interest of modern and traditional buildings alike

*The Future of Heritage Science and Technologies: ICT and Digital Heritage* Rocco Furferi, Lapo Governi, Yary Volpe, Kate Seymour, Anna Pelagotti, Francesco Gherardini, 2022-10-29 This volume constitutes the refereed proceedings of the Third International Conference on The Future of Heritage Science and Technologies Florence Heri Tech 2022 held in Florence Italy in May 2022 The 32 papers presented in this volume were thoroughly reviewed and selected from 101 submissions They are organized in the topical sections on 3D reconstruction of tangible cultural heritage and monitoring devices IA and AR VR based methods and applications for CH methods and systems for enhancing heritage fruition and storytelling virtual museums and virtual tours

**Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl** Avery Library, 1996

The Conservation of Twentieth Century Historic Buildings Peter Burman, Keith Garner, Leo Schmidt, 1996-01-01

Roca, 2018-10-30 Structural Analysis of Historical Constructions contains about 160 papers that were presented at the IV International Seminar on Structural Analysis of Historical Constructions that was held from 10 to 13 November 2004 in Padova Italy Following publications of previous seminars that were organized in Barcelona Spain 1995 and 1998 and Guimarães Portugal 2001 state of the art information is presented in these two volumes on the preservation protection and restoration of historical constructions both comprising monumental structures and complete city centers These two proceedings volumes are devoted to the possibilities of numerical and experimental techniques in the maintenance of historical structures In this respect the papers originating from over 30 countries are subdivided in the following areas Historical aspects and general methodology Materials and laboratory testing Non destructive testing and inspection techniques Dynamic behavior and structural monitoring Analytical and numerical approaches Consolidation and strengthening techniques Historical timber and metal structures Seismic analysis and vulnerability assessment Seismic strengthening and innovative systems Case studies Structural Analysis of Historical Constructions is a valuable source of information for scientists and practitioners working on structure related issues of historical constructions

**Multi-scale Perspectives on Building Heritage Conservation and Sustainable Cities** Graziella Bernardo, Luis Manuel Palmero Iglesias, 2025-07-26 The book investigates modern architecture as an architectural and cultural heritage highlighting with a holistic view of sustainability the aspects that have led to epochal changes in the way cities are designed and lived Currently many of these buildings spread throughout the world are not recognized as architectural heritage due to the lack of knowledge of innovations in design approaches materials and building technologies and their social and economic

implications in the development of contemporary cities The main objective is to raise awareness promote revalue and preserve the building heritage of the last century through their maintenance and adaptive reuse to the changing needs of the community according to new models of the circular economy and the use of digital technologies The topics treated with multidisciplinary approaches reconstruct a recent past of which memory has been lost and highlight how the heritage built is a resource of incalculable value that can greatly contribute to the sustainability of cities

### **Designing from Heritage**

Marieke Kuipers, Wessel de Jonge, 2025-01-21 Designing from Heritage deals with challenges architects are faced with when dealing with the conservation and reuse of built heritage with a focus on Modern Movement Monuments It discusses how to carry out a thorough analysis and evaluation of monuments upon which their conservation and transformation can be based It is meant for MSc education but may be of interest to architects in general This book the third in the Rondeltappe series reflects the philosophy and didactic approach of Heritage and Architecture H A section of the Faculty of Architecture and the Built Environment Delft University of Technology H A has three chairs Design Cultural Value and Technology They work in close cooperation to lay the foundations for the preservation and continuity of use of built heritage Designing from Heritage is strongly connected to the first book in the Rondeltappe series which deals with durability and sustainability of monuments and with the second which advocates freedom in heritage based design It contains the contribution of Prof Wessel de Jonge the Chair of Heritage and Design and principle at Wessel de Jonge Architects and Prof Marieke Kuipers Chair of Cultural Heritage in particular of the Architecture of the Twentieth Century and senior specialist of Twentieth Century Built Heritage at the Cultural Heritage Agency of the Netherlands RCE Designing from Heritage is subdivided in four chapters The first a contribution by Wessel de Jonge sketches issues of transitoriness and timelessness related to the reuse of Modern Movement monuments Their values characteristics and potentials are the foundations for architectural design aimed at guaranteeing their future lives In the second chapter Marieke Kuipers presents a didactic exercise in critical observation of the architectural object In the third she discusses the interpretation of tangible and intangible heritage values in order to specify the main characteristics and critical issues in relation to continuity and change Finally Wessel de Jonge presents his experience of the role of the architect in relation to heritage value assessment with specific reference to the conservation of Modern Movement monuments This book is part of a series of books produced in cooperation with and financed by the Stichting Rondeltappe Bernoster Kemmers All books of the series have been reviewed and edited by Silvia Naldini Section of Heritage Architecture Faculty of Architecture and the Built Environment Delft University of Technology The Netherlands

*London's 'Big Bang' Moment and its Architectural Conversations* Stephen Rosser, 2025-06-30 This book explores the topic of architecture as a component of public discourse focussing on the reception of four high profile developments in the City of London the UK capital's financial district dating from the final years of the twentieth century During this time the City's mode of operation culture and built environment were all transformed as a result of the market deregulation process labelled

Big Bang It was also a period which saw the subject of architecture attracting public and media attention becoming a prominent feature of national conversation The book examines the extensive and often contentious discourse generated by the four case study projects It looks at how these projects were viewed and interpreted retrospectively when they had become part of the City's long and rich history Topics explored include building and urban form on the eve of the millennium the place of new development in a setting of unique historic importance the iconic building and celebrity architect and the role of then Prince Charles as an architectural critic Also referenced are many of the broader issues of the day including the Thatcher government policies and the preoccupations concerning London's infrastructure public realm inner city areas and inequalities Furthermore ranging across the discourse is the theme of the relationship between buildings and global finance foreshadowing later controversies concerning London's post millennial towers and their impact on the capital's skyline The book will be of interest to researchers and students of late twentieth century British architecture and urban development London's history and UK public discourse in the 1980s a decade of profound political economic and social change
