Conservation For Development In Nepal:

Conservation for Development in Nepal Sasinath Jha, 1990 In Nepal dependence on renewable resources is considerable. A sound long term strategy is needed for managing these judiciously in order to prevent their non reversible degradation. This alone will ensure a minimum standard of living on a sustainable basis for our growing population. For sustainable development this book adopts two major approaches for setting right the backlog of past ecological sins and a preventive approach to insulate the country from future environmental damage. This book is not written as a strict scientific treatise nor as a book for specialists although it is hoped they will be interested but for anyone with an interest in nature or economics. If you read it without being interested it is hoped you will become so. **Conservation Or Development in**

Conservation, 1984 **Ecosystem Restoration through Managing Socio-Ecological Production Landscapes and Seascapes (SEPLS)** Maiko Nishi, Suneetha M. Subramanian, 2023-09-09 This open access book is a compilation of case studies that provide useful knowledge and lessons that derive from on the ground activities and contribute to policy recommendations focusing on the relevance of social ecological production landscapes and seascapes SEPLS to ecosystem restoration. Building on the concept of SEPLS the Satoyama Initiative promotes landscape approaches as integrative area based strategies to bring together diverse stakeholders aiming to balance multiple objectives including conservation and development for the benefit of biodiversity and human well being. Many of the SEPLS case studies from the International Partnership for the Satoyama Initiative IPSI offer rich evidence to help guide restoration efforts while advancing relevant knowledge and practices. The book highlights how the efforts in managing SEPLS can contribute to ecosystem restoration and sustainable development looking at the strategies and approaches by which multiple stakeholders express negotiate and embrace their plural value perspectives of nature to restore ecosystems within a landscape or seascape. It begins with an introductory chapter followed by twelve case studies and a synthesis clarifying the relevance of the case study findings to policy and academic discussions. This book will be of interest to scholars policymakers and professionals in the field related to sustainable development especially on SDGs 15 and 17. **Environmental Sustainability from the Himalayas to the**

Oceans Shikui Dong, Jayanta Bandyopadhyay, Sanjay Chaturvedi, 2017-01-23 The book is written in the backdrop of the environmental impacts of and future requirements from the natural environment for rapid economic growth that has characterized recent economic history of China and India especially over the past few decades. The environmental impacts of such rapid economic changes have been more frequently than otherwise degrading in character. Environmental impacts of economic activities create degraded natural ecosystems by over utilization of nature's provisioning ecosystem services from Himalaya to the Ocean as well by the use of the natural environment as sink for dumping of unmarketable products or

unused inputs of economic activities Such processes affect wide range of ecosystem processes on which the natural environment including human population depend on Critical perspectives cast by various chapters in this book draw attention to the various ways in which space and power interact to produce diverse geographies of sustainability in a globalizing world They also address the questions such as who decides what kind of a spatial arrangement of political power is needed for sustaining the environment Who stands to gain or lose what when where and why from certain geographical areas being demarcated as ecologically unique fragile and vulnerable environments Whose needs and values are being catered to by a given ecosystem service What is the scope for critical inquiry into the ways in which the environment is imagined represented and resisted in both geopolitical struggles and everyday life The book provides insights to both academics from diverse disciplines and policy makers civil society actors interested in mutual exchange of knowledge between China and India
