Natural Environments John V. Krutilla, 2013-10-18 This study represents the first scholarly attempt to consider the difficult allocation problems associated with management of natural resources and proposed changes in the natural environment Originally published in 1973 Places in Knots Martin Saxer, 2023-01-15 Tracing the experiences of mobile Himalayans across the globe Places in Knots describes the ways in which Himalayan people relate to the multiple places they inhabit and the work and trouble of keeping their communities tied together Martin Saxer describes global Himalayan ventures as a form of expansion of community rather than out migration Moving out does not sever the bonds of community Instead it is the pull that tightens the knot Coffee table books and trekking agencies continue to advertise the Himalayas as remote hidden valleys and NGOs see them as fragile mountain ecosystems to be protected from global forces of destruction Places in Knots shows how these tropes of remoteness inform development and conservation policies and thus shape the contexts in which Himalayan connections with the wider world are forged and maintained Following Himalayan journeys between valleys in Nepal and beyond Saxer draws a picture of globalization that emerges not from the centers or below but

rather from the edge Thanks to generous funding from LMU München the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

Sustainability Bryan G. Norton, 2010-11-15 While many disciplines contribute to environmental conservation there is little successful integration of science and social values Arguing that the central problem in conservation is a lack of effective communication Bryan Norton shows in *Sustainability* how current linguistic resources discourage any shared multidisciplinary public deliberation over environmental goals and policy In response Norton develops a new interdisciplinary approach to defining sustainability the cornerstone of environmental policy using philosophical and linguistic analyses to create a nonideological vocabulary that can accommodate scientific and evaluative environmental discourse Emphasizing cooperation and adaptation through social learning Norton provides a practical framework that encourages an experimental approach to language clarification and problem formulation as well as an interdisciplinary approach to creating solutions By moving beyond the scientific arena to acknowledge the importance of public discourse *Sustainability* offers an entirely novel approach to environmentalism

Cultural Heritage as Civilizing Mission Michael Falser, 2015-03-04 This book investigates the role of cultural heritage as a constitutive dimension of different civilizing missions from the colonial era to the present It includes case studies of the Habsburg Empire and German colonialism in Africa Asian case studies of post colonial India and the Dutch East Indies Indonesia China and French Indochina and a special discussion on 20th century Cambodia and the temples of Angkor The themes examined range from architectural and intellectual history to historic preservation and restoration Taken together they offer an overview of historical processes spanning two centuries of institutional practices wherein the concept of cultural heritage was appropriated both by political regimes and for UNESCO World Heritage agendas
