Dunn, Rita Mae Kelly, This latest volume of the Policy Studies Review Annual series brings together leading policy scientists in a comprehensive review of the field s achievements since its professionalization some forty years ago If an advance is defined as an improvement in theory methodology information or practice how does the field measure up And what should its next goals be This unusual compendium of entirely new essays and articles helps to answer such questions On balance the contributors show the record is mixed Policy sciences draw on the theoretical foundations of many disciplines but have not themselves contributed theoretical advances We have more information but information in itself does not constitute an advance Despite improved interaction between academia and government it is difficult to identify new or better policies that have resulted On the other hand there have been impressive advances in methodology procedures for conducting inquiry that yield reliable and relevant policy knowledge In its candid assessment of trends controversies and unsolved problems this volume charts new directions for the

Nagel, 1992-10-23 Decision aiding software the underpinning of computer aided judicial analysis can facilitate the prediction of how cases are likely to be decided prescribe decisions that should be reached in such cases and help administrate more efficiently the court process It can do so says Nagel by listing past cases on each row of a spreadsheet matrix by listing predictive criteria in the columns and in general by showing for each factual element the estimated probability of winning a case The software aggregates the information available and deduces likely outcomes But it can also prescribe judicial decisions by listing alternatives in the rows the goals to be achieved in the columns and by showing relations between alternatives in the cells By similar means decision aiding software can also help perform administrative tasks such as rationally assigning judges or other personnel to cases and by sequencing cases to reduce the time consumed by each case In Part I Nagel provides an overview of computer aided analysis and the role of decision aiding software in the legal process In the second part he deals with judicial prediction from prior cases and from present facts and in the third part he emphasizes the prescribing role of judges particularly in deciding the rules that ought to be applied in civil and criminal procedures Nagel also covers computer aided mediation and provides a new perspective on judicial decisions Then in Part IV he treats at length the process of judicial administration and how to improve its efficiency Of particular interest to court personnel will be the benefits to be derived from reducing delays and in the docketing and sequencing of cases **The Liberal Magazine**, 1922 The Age of Impeachment David E. decision aiding software the multi criteria approach can allow each side to give on various criteria that are not important to it but are important to the other side In this way a super optimum solution may even be met in which both sides receive something significantly better than they had expected Such a result is very difficult if not impossible to achieve Stuart Nagel points out in traditional single dimension dispute resolution Nagel and Mills describe the nature of multi criteria dispute resolution utilizing decision aiding software The first part of the book clarifies the general character of computer aided negotiation computer aided mediation and super optimizing dispute resolution Part two guides the reader through the use of Policy Goal Percentaging P G% decision aiding software centering on general decision making negotiation mediation and prediction of outcomes Multi criteria resolution in the context of rule making and legal policy disputes is the focus of part three where such matters as determining initial alternatives and criteria resolving deadlocks and arriving at super optimum solutions are discussed Part four emphasizes dispute resolution in the context of rule applying and litigation disputes as well as mediation at the international level and between lawyers and clients The final part deals with future applications such as computer aided mediation and group decision making with phone modems The book s combination of decision aiding software arbitration mediation and super optimum expansionist decision making brings a truly innovative approach to the topic of dispute resolution This volume should be a welcome addition to academic legal and public libraries and a valuable reference work for lawyers law students and legal professors and researchers [History for Ready Reference ...](#) Josephus Nelson Larned,1910
