*Console and Classify* Jan Ellen Goldstein, 1990 *Essays in the History of Therapeutics* , 2020-01-29 Therapeutics has been central to

the medical enterprise in all times and all places but a subject that is all too often neglected by historians The essays in this volume follow a range in chronology from antiquity to the 1980s and in geography from the Mediterranean Basin to the New World They touch on such matters as diet and drugs magic and surgery orthodox and unorthodox approaches What they share is an attempt to get beyond the easy dismissal of almost all therapeutics before the twentieth century as meaningless and harmful and to examine concrete dimensions of the therapeutic encounter in its social professional religious and scientific reverberations

Vice and Psychiatric Diagnosis John Z. Sadler, 2024-02-28 Vice and Psychiatric Diagnosis begins with the simple question of why some categories of mental disorder include immoral or criminal conduct as diagnostic features while most mental disorders in the DSM and ICD do not involve such vice laden concepts While this initial puzzle seems to concern only the limited domain of psychiatric nosology Sadler's expansive scholarship reveals that this simple question leads inexorably to complex questions about the role of madness and morality in intellectual history and to today's many conflicts and contradictions in the policy and culture of mental health criminal justice and related social welfare efforts The book outlines the implications of vice concepts being incorporated into psychiatric diagnosis and clinical practice leading to some of the vexing problems in mental health and social care These issues include the fragmentation of care in social welfare efforts involving mentally ill people criminal offenders intellectually disabled individuals and juvenile offenders The analysis extends to cultural attitudes and policies as well the insanity defense managing the mentally ill criminal offender the value of punishment in criminal justice and derivative issues such as the ethics of forensic psychiatry the growing problem of mass shootings stigma health literacy and the difficulties in pursuing rigorous and consistent approaches to psychiatric diagnostic classification In the pursuit of untangling these threads of vice and psychiatric diagnosis Sadler provides a brief history of ideas about madness and morality beginning in prehistory and extending into the late 20th century The lessons from this history are applied in subsequent chapters examining the vice mental disorder relationship from the perspectives of philosophical conceptual issues the perspectives of criminal law and the criminal justice system and the perspectives of public interest and public opinion The concluding chapters formulate an alternative way of thinking about the vice mental disorder relationship in clinical practice and public policy culminating in Forty Theses which present the detailed conclusions and social implications for this monumental work

**Social Order/mental Disorder** Andrew T. Scull, 1989-01-01

Approaching Hysteria Mark S. Micale, 2019-01-15 Few diseases have exercised the Western imagination as chronically as hysteria from the wandering womb of ancient Greek medicine to

the demonically possessed witch of the Renaissance from the vaporous salong women of Enlightenment Paris through to the celebrated patients of Sigmund Freud with their extravagant erotically charged symptoms In this fascinating and authoritative book Mark Micale surveys the range of past and present readings of hysteria by intellectual historians historians of science and medicine scholars in gender studies art history and literature and psychoanalysts psychiatrists clinical psychologists and neurologists In so doing he explores numerous questions raised by this evergrowing body of literature Why in recent years has the history of hysterical disorders carried such resonance for commentators in the sciences and humanities What can we learn from the textual traditions of hysteria about writing the history of disease in general What is the broader cultural meaning of the new hysteria studies In the second half of the book Micale discusses the many historical cultures of hysteria He reconstructs in detail the past usages of the hysteria concept as a powerful descriptive trope in various nonmedical domains including poetry fiction theater social thought political criticism and the arts His book is a pioneering attempt to write the historical phenomenology of disease in an age preoccupied with health and a prescriptive remedy for writing histories of disease in the future Mark S Micale is Assistant Professor of History at Yale He is the editor of *Beyond the Unconscious* Essays of Henri F Ellenberger Princeton Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

*Possessed* Rebecca R. Falkoff, 2021-05-15 In *Possessed* Rebecca R Falkoff asks how hoarding once a paradigm of economic rationality came to be defined as a mental illness Hoarding is unique among the disorders included in the American Psychiatric Association's DSM 5 because its diagnosis requires the existence of a material entity the hoard *Possessed* therefore considers the hoard as an aesthetic object produced by clashing perspectives about the meaning or value of objects The 2000s have seen a surge of cultural interest in hoarding and those whose possessions overwhelm their living spaces Unlike traditional economic elaborations of hoarding which focus on stockpiles of bullion or grain contemporary hoarding results in accumulations of objects that have little or no value or utility Analyzing themes and structures of hoarding across a range of literary and visual texts including works by Nikolai Gogol Arthur Conan Doyle Carlo Emilio Gadda Luigi Malerba Song Dong and E L Doctorow Falkoff traces the fraught materialities of the present to cluttered spaces of modernity bibliomaniacs libraries flea markets crime scenes dust heaps and digital archives *Possessed* shows how the figure of the hoarder has come to personify the economic epistemological and ecological conditions of modernity Thanks to generous funding from New York University and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access OA volumes from Cornell Open [cornellpress.cornell.edu/cornell-open](http://cornellpress.cornell.edu/cornell-open) and
