Conspirators Of Pleasure:

The Art of Czech Animation Adam Whybray, 2020-06-25 The Art of Czech Animation is the first comprehensive English language account of Czech animation from the 1920s to the present covering both 2D animation forms and CGI with a focus upon the stop motion films of Jir Trnka Herm na T rlov Jan vankmajer and Jir Barta Stop motion is a highly embodied form of animation and The Art of Czech Animation develops a new materialist approach to studying these films Instead of imposing top down Film Theory onto its case studies the book s analysis is built up from close readings of the films themselves with particular attention given to their non human objects In a time of environmental crisis the unique way Czech animated films use allegory to de centre the human world and give a voice to non human aspects of the natural world points us towards a means by which culture can increase ecological awareness in viewers Such a refutation of a human centred view of the world was contrary to communist orthodoxy and it remains so under late stage consumer capitalism As such these films do not only offer beautiful examples of allegory but stand as models of political dissent The Art of Czech Animation is a unique endeavour of film philosophy to provide a materialist appraisal of a heretofore neglected strand of Central Eastern European cinema
