Ford,Richard M. Lerner,1992-05-30 For decades there hasn't been an integrative theory of development only theories about various

developmental domains such as language acquisition personality and peer relations Two leading developmentalists Donald H Ford and Richard M Lerner present the first integrative theory on human development Through a synthesis of developmental contextualism and the Living Systems Framework the authors develop a theory that examines how a person carries out transactions with their environment and through that transaction how their biological psychological behavioral and environmental elements change or remain constant They also offer important implications of Developmental Systems Theory DST for research implications for use in educational and clinical settings and the usefulness of DST in the formulation of social policy By integrating the result from many research investigations into a larger framework Developmental Systems Theory offer researchers professionals and students a better understanding of how multiple elements interact and shape a person's life

Handbook of Intelligence Benjamin B. Wolman, 1985-10-10 The first work to cover the entire field of intelligence from historical beginnings through conceptual and practical development to the latest research Experts in the field describe various theories on intelligence from a historical perspective Then they discuss methods of measurement and controversial issues concerning the use of intelligence tests in clinical and educational fields The final chapters cover the application of intelligence tests in every possible area

Developmental Psychology: Theoretical perspectives J. Gavin Bremner, Charlie Lewis, 2005

Ethics in Applied Developmental Psychology Celia B. Fisher, Warren W. Tyron, 1990

Nineteen contributed chapters illustrate those applied activities in which developmental psychologists are currently engaged and identify and provide guidelines for the ethical problems encountered in such activities The authors draw from their own experience to identify issues that emerge as developmental psychology is applied beyond the laboratory
