Ternary Alloys, Ternary

Alloys Volume 1: Ag-Al-Au to Ag-Cu-P Günter Petzow, Günter Effenberg, 1989-01-31 Volumes 1 and 2 of Ternary Alloys present a critical evaluation of all known phase diagram data for ternary silver systems The 446 systems are arranged in alphabetical order and have a standard format allowing easy access to the required data The following information is provided liquidus projections isothermal and vertical sections reaction schemes invariant equilibria and crystallographic data accompanied by short descriptive texts and extensive references All data and diagrams selected for inclusion have been critically examined and reviewed by a panel of experts from eight countries under the authority of the Max Planck Institute for Metals Research in Stuttgart The compendium is the most comprehensive source of reliable data on ternary silver systems available worldwide It will prove indispensable to everyone concerned with the research and development of materials such as

materials scientists and engineers metallurgists chemical engineers inorganic chemists and physicists Concise Encyclopedia of the Structure of Materials J. W. Martin, 2006-10-30 This Concise Encyclopedia draws its material from the award winning Encyclopedia of Materials Science and Technology and includes updates and revisions not available in the original set This customized collection of articles provides a handy reference for materials scientists and engineers with an interest in the structure of metals polymers ceramics and glasses biomaterials wood paper and liquid crystals Materials science and engineering is concerned with the relationship between the properties and structure of materials In this context structure may be defined on the atomic scale in the case of crystalline materials on the molecular scale in the case of

polymers for example or on the microscopic scale Each of these definitions has been applied in making the present selection of articles Brings together articles from the Encyclopedia of Materials Science Technology that focus on the structure of materials at the atomic molecular and microscopic levels plus recent updates Every article has been commissioned and written by an internationally recognized expert and provides a concise overview of a particular aspect of the field Extensive bibliographies cross referencing and indexes guide the user to the most relevant reading in the primary literature
