Albi, 2005-06-30 In the wake of the EU's biggest enlargement this book explores the adaptation of the constitutions of Central and Eastern Europe CEE for membership in the European Union In response to the painful past these new constitutions were notably closed to transfer of powers to international organizations and accorded a prominent status to sovereignty and independence A little more than a decade later the process of amending these provisions in view of the transfer of sovereign powers to a supranational organization has proved a sensitive and controversial exercise This book analyses the amendments against the background of comparative experience and theory of sovereignty as well as the context of political sensitivities such as rising euroscepticism ahead of accession referendums

**Constitutions of Europe (2 vols.)** Council of Europe/Conseil de l'Europe, 2004-02-01 Over the last two decades the political landscape of Europe has evolved significantly with many central and east European countries taking major steps towards establishing more liberal and democratic societies largely through constitutional change This unique collection groups together the constitutions of 46 European countries including all the Council of Europe member states as well as Belarus and Serbia and Montenegro and traces the historical background of each Presented on a country by country basis and highly accessible each section provides maps and key factual data on the country concerned This unique reference work will be of particular interest to constitutional law

specialists policy makers researchers libraries and all those interested in comparative law and in learning more about the process of constitutional drafting      National Constitutions in European and Global Governance: Democracy, Rights, the Rule of Law Anneli Albi, Samo Bardutzky, 2019-05-29 This two volume book published open access brings together leading scholars of constitutional law from twenty nine European countries to revisit the role of national constitutions at a time when decision making has increasingly shifted to the European and transnational level It offers important insights into three areas First it explores how constitutions reflect the transfer of powers from domestic to European and global institutions Secondly it revisits substantive constitutional values such as the protection of constitutional rights the rule of law democratic participation and constitutional review along with constitutional court judgments that tackle the protection of these rights and values in the transnational context e g with regard to the Data Retention Directive the European Arrest Warrant the ESM Treaty and EU and IMF austerity measures The responsiveness of the ECJ regarding the above rights and values along with the standard of protection is also assessed Thirdly challenges in the context of global governance in relation to judicial review democratic control and accountability are examined On a broader level the contributors were also invited to reflect on what has increasingly been described as the erosion or twilight of constitutionalism or a shift to a thin version of the rule of law democracy and judicial review in the context of Europeanisation and globalisation processes The national reports are complemented by a separately published comparative study which identifies a number of broader trends and challenges that are shared across several Member States and warrant wider discussion The research for this publication and the comparative study were carried out within the framework of the ERC funded project The Role and Future of National Constitutions in European and Global Governance The book is aimed at scholars researchers judges and legal advisors working on the interface between national constitutional law and EU and transnational law The extradition cases are also of interest to scholars and practitioners in the field of criminal law Anneli Albi is Professor of European Law at the University of Kent United Kingdom Samo Bardutzky is Assistant Professor of Constitutional Law at the University of Ljubljana Slovenia

**The New Constitutions of Europe** Howard Lee McBain, Lindsay Rogers, 1922      The Constitution for Europe Marcel Kielhorn, 2005 A Constitution for Europe Why do we need it Is it really better than the current treaty based system Which difficulties faces the ratification process This book answers these questions and provides an analysis of the Treaty establishing a Constitution for Europe It visualizes the huge importance of the document for a working EU emphasizes the prospects of a really unified continent and shows that Europe as well as the EU stands at the crossroads of its future fate Hopefully its politicians and people do not decide to turn into a blind alley      *The Constitution of Europe* Joseph Weiler, 1999-02-25 Joseph Weiler presents essays written during the 1990s on issues related to European constitutional law In a series of highly accessible discussions concerning the legal framework of the European Communities and the European Union Professor Weiler describes the gradual strengthening of transnational European institutions at the expense of national

legislators Although individuals as legal consumers have been empowered by Community law he writes this has been at the expense of their rights as citizens The Constitution of Europe thus provides from a legal perspective a balanced and authoritative critique of the attractions and demerits of the goal of European integration The New Democratic Constitutions of Europe Agnes Headlam-Morley,1928 *Adoption and Amendment of Constitutions in Europe and America* Charles Borgeaud,1895 **The Constitution for Europe** Jean-Claude Piris,2006-03-30 Publisher Description

*Understanding the European Constitution* Clive H. Church,David Phinnemore,2005-11-16 The European Union is now entering a crucial phase as the ratification process accelerates and key debates and referenda take place in existing and potentially new member states The Union's Constitutional treaty is often cast as either a blueprint for a centralized and protectionist super state or as the triumph of Anglo Saxon economics Yet it has been little read particularly in the United Kingdom This book puts this right by publishing the full text of the crucial first part of the document and showing that it does not justify either of the extreme interpretations imposed on it Written by two experts of the treaties *Understanding the European Constitution* sets the Constitutional Treaty in context examining its main themes and content and considering the implications of any rejection It does this in uncomplicated language and with the help of explanatory tables and a glossary Those who wish to make a considered verdict on the basis of the facts will find it invaluable *The European Constitution* Giuliano Amato,2009-01-01 I can enthusiastically recommend and endorse this book It serves the very important purpose of collecting key documents together in an elegant and accessible text There currently exists a huge proliferation of material on the EU Constitution this volume makes a very wise selection of this profusion compiling it into a manageable and informative whole Nine chapters deal with the most significant matters concerning the Constitution A short but well written introduction at the start of each chapter precedes following extracts Part of the value of this book lies in the fact that it includes translations of some important documents which are difficult or impossible to access in English for example recent decisions of national courts concerning the European Arrest Warrant All in all this work is a comprehensive but not overwhelmingly large collection of materials on the EU Constitution and it will prove extremely valuable to all those working within this area of law By presenting the Constitution the background to the Constitution and the issues it deals with in this clear and informative way it will shed new light upon and help all of us to form our own judgements on the EU Constitution and its importance to our lives Sionaidh Douglas Scott King's College London UK Whatever the ultimate fate of the EU's Constitutional Treaty both the events which led to its conclusion and those which occurred afterwards during its ill fated ratification process have profoundly shaped the future of the European Union as a constitutional project This collection of materials offers an invaluable set of resources for understanding these events in their widest legal and political context The text will be useful to all those who seek to understand both why the EU has reached such a turning point and where it might go in the future Jo Shaw Edinburgh Law School UK This book offers a selection of materials that enable a better

understanding of some of the most important changes that would be introduced by the Treaty establishing a Constitution for Europe in the EU legal and political system. It also helps to assess the need for the reforms embedded in the Constitutional Treaty as well as the quality of the formulations agreed upon by the signatory Member States. The book includes excerpts of the European Convention's work, selected statutory and constitutional provisions of the Member States, and also related passages from pertinent court decisions from both European courts as well as Member States constitutional courts. Institutional and doctrinal analyses and relevant excerpts from the Constitutional Treaty itself are also included. Many of these documents directly relate to the provisions of the Constitutional Treaty while the others, although not directly related, are nevertheless relevant to the debate surrounding it. The European Constitution by two of the best experts on the Constitution for Europe will be of great interest to researchers and teachers in the fields of European Law and European politics and also to policy makers in European affairs.

**A Constitution for Europe**, 2004

**The Constitution of the European Union** Ulrich Haltern, 2005-01-23 This book provides a contextual analysis of the constitution of the European Union which, unlike most constitutions, does not belong to a state. Rather, the EU is an international organisation that has moved beyond the features of international law into a terrain very close to the municipal law of federal states. Many features we take for granted in nation states are non-existent or contested in the Union. There is no European Union constitutional text in the proper sense; the Constitutional Treaty signed by the Member States in 2004 failed spectacularly in the process of popular ratification. The Union's founding texts were international treaties, international law, not constitutional law. And yet, over time, legal doctrine put into place by the European Court of Justice in Luxembourg has led to constitutional attributes of Union law, and political practice led by the Commission has mirrored these attributes, complementing a de facto constitutionalist environment. As a consequence, we have seen a steady re-ordering of the functional boundaries of the Member States, followed by a nascent re-ordering of the imagined boundaries of political community and self. All of this is constitutionalism writ large: legal doctrines, institutional arrangements, political practices, and their implications for legitimacy, democracy, and political self-imagination, and together they form the subject of this fascinating book.

**Constitutions of Nations** Amos J. Peaslee, 2013-12-14

*Constitutions of Nations* Amos Jenkins Peaslee, 1974

**INTERNATIONAL STATUS** Albania is a member of the United Nations, December 14, 1955. It is a member of other international organizations. It was a member of the League of Nations. Albania became independent on November 28, 1912, after centuries of Ottoman domination. Its existence was recognized internationally after the First Balkan War on July 28, 1913, and an international control commission drew up a constitution in 1914 providing for a monarchy with a National Assembly, most of whose members were elected by the people. 4. Albania Although a neutral state, Albania became involved in the First World War, after which, in January 1920, the Albanian chiefs drew up a new constitution providing for a monarchy. In 1925, Albania was proclaimed a republic, and a new constitution based on the United States constitution was promulgated. In 1928, the President became King.

and a new constitution followed On April 7 1939 Italy occupied Albania and imposed a constitution providing that Albania was a monarchy under the House of Savoy On April 6 1941 martial law was proclaimed throughout the country After the Italian capitulation in 1943 Albania was occupied by Germany The Albanian Communist Party was founded in November 1941 and the bases of the communist regime were laid at the second national conference in July 1943 of the Movement for National Liberation created by the Party to unite and control all the forces opposing foreign occupation This conference created Councils of National Liberation The New Democratic Constitutions of Europe Agnes Headlam-Morley, 1929

**Constitutional Review in Europe** Maartje de Visser, 2013-11-22 Constitutions serve to delineate state powers and enshrine basic rights Such matters are hardly uncontroversial but perhaps even more controversial are the questions of who should uphold the Constitution and how constitutional review is organised These two questions are the subject of this book by Maartje de Visser which offers a comprehensive comparative analysis of how 11 representative European countries answer these questions as well as a critical appraisal of the EU legal order in light of these national experiences Where possible the book endeavours to identify Europe's common and diverse constitutional traditions of constitutional review The rationale for the jurisdiction and composition of constitutional courts are explored and so too are core features of the constitutional adjudicatory process Yet this book also deliberately draws attention to the role of non-judicial actors in upholding the Constitution as well as the complex interplay amongst constitutional courts and other actors at the national and European level The Member States featured are Belgium the Czech Republic Finland France Germany Italy Hungary the Netherlands Spain Poland and the United Kingdom This book is intended for practitioners academics and students with an interest in European constitutional law **The Rise and Fall of the European Constitution** NW Barber, Maria Cahill, Richard Ekins, 2019-01-10 The Draft European Constitution was arguably both an attempt to constitutionalise the Union reframing that project in the language of the state and an attempt to stretch the boundaries of constitutionalism itself reimagining that concept to accommodate the sui generis European Union The partial failure of this project is the subject of this collection of essays The collection brings together leading EU constitutional scholars to consider with the benefit of hindsight the purportedly constitutional character of the proposed Constitutional Treaty the reasons for its rejection by voters in France and the Netherlands the ongoing implications of this episode for the European project and the lessons it teaches us about what constitutionalism really means
