Constraint Databases And Applications:

 Constraint Databases and Applications Bart Kuijpers,Peter Revesz,2004-10-14 The rst International Symposium on the Applications of Constraint Databases CDB2004 took place in Paris France on June 12 13 2004 just before the ACM SIGMOD and PODS conferences Since the publication of the paper Constraint Query Languages by Kan lakis Kuper and Revesz in 1990 the last decade has seen a growing interest in constraint database theory query evaluation and applications re ected in a variety of conferences journals and books Constraint databases have proven to be extremely exible and adoptable in environments that relational database systems cannot serve well such as geographic information systems and bioinf matics This symposium brought together people from several diverse areas all c tributing to the practice and the application of constraint databases It was a continuation and extension of previous workshops held in Friedrichshafen G many 1995 Cambridge USA 1996 Delphi Greece 1997 and Seattle USA 1998 as well as of the work in the comprehensive volume Constraint Data ses edited by G Kuper L Libkin and J Paredaens 2000 and the textbook Introduction to Constraint Databases by P Revesz 2002 The aim of the symposium was to open new and future directions in c straint database research to address constraints over domains other than the reals to contribute to a better implementation of constraint database systems in particular of query evaluation to address e cient quanti er elimination and to describe applications of constraint databases
