Constraints on U.S. Strategy in Third World Conflicts Stephen T. Hosmer,1987 **Constraints on U.S. Strategy in Third World Conflict** Stephen T. Hosmer,Rand Corporation,1985 **Constraints on U.S. Military Strategies in Past Third World Conflicts** Stephen T. Hosmer,1984 This Rand note assesses the principal military and political constraints that have limited U S military involvements in the Third World underdeveloped areas since World War II The work represents the first phase of a study of the political and military factors that are likely to constrain U S strategies and combat operations in future Third World conflicts and crises the implications of such constraints for the design and execution of U S strategies for meeting future challenges in the Third World and the requirements that particular constraints may pose for future U S Air Force missions and capabilities The motivations that have led U S decisionmakers to constrain combat operations and other military responses show striking continuity They stem primarily from the concern to control the risks of military conflict with the USSR limit civilian and U S military casualties seek negotiated solutions to conflicts and accommodate the policies of other nations Successive administrations whatever their affiliation have tended to base strategies more on what the United States should not or dare not do than on the optimum requirements of the actual battlefield situation **A Handbook Of American Military History** Jerry Sweeney,2019-09-25 This unique reference work covers the military history of the United States from the Revolution to the Gulf War The Handbook of American Military History is comprehensive easy to use and supplies essential information on the social technological political tactical and strategic developments that have affected the evolution of the U S *Peacemaking, Peacekeeping and Coalition Warfare* Fariborz L. Mokhtari,1994 Peacemaking, Peacekeeping, and Coalition Warfare Fariborz Levaye Mokhtari,1994 Conflict and War in the Middle East Bassam Tibi,1998-09-28 Few studies of Middle East wars go beyond a narrative of events and most tend to impose on this subject the rigid scheme of superpower competition The Gulf War of 1991 however challenges this view of the Middle East as an extension of the global conflict The failure of the accord of both superpowers to avoid war even once regional superpower competition in the Middle East had ceased must give rise to the question Do regional conflicts have their own dynamic Working from this assumption the book examines local regional constraints of Middle East conflict and how through escalation and the involvement of extra regional powers such conflicts acquire an international dimension The theory of a regional subsystem is employed as a framework for conceptualising this interplay between regional and international factors in Tibi s examination of the Middle East wars in the period 1967 91 Tibi also provides an outlook into the future of conflict in the Middle East in the aftermath of the most recent Gulf War **The Dynamics of Coercion** Daniel Byman,Matthew Waxman,2002-02-04 Successful coercion should be relatively simple for the United States Since the demise of the Soviet Union the United States is without rivals in military might political influence or economic strength Yet despite the lopsided US edge in raw power regional foes persist in defying the threats and ultimatums brought by the United States and its allies

This book examines why some attempts to strong arm an adversary work while others do not It explores how coercion today differs from coercion during the Cold War It describes the constraints on the United States emanating from the need to work within coalitions and the restrictions imposed by domestic politics and it assesses the special challenges likely to arise when an adversary is a non state actor or when the use of weapons of mass destruction is possible **Selected Rand Abstracts**
