Contrastive Studies in Construction

Grammar Hans C. Boas, 2010-11-11 The papers in this volume provide a contrastive application of Construction Grammar. By referencing a well described constructional phenomenon in English, each paper provides a solid foundation for describing and analyzing its constructional counterpart in another language. This approach shows that the semantic description, including discourse pragmatic and functional factors of an English construction, can be regarded as a first step towards a tertium comparationis that can be employed for comparing and contrasting the formal properties of constructional counterparts in other languages. Thus, the meaning pole of constructions should be regarded as the primary basis for comparisons of constructions across languages; the form pole is only secondary. This volume shows that constructions are viable descriptive and analytical tools for cross linguistic comparisons that make it possible to capture both language specific idiosyncratic properties as well as cross linguistic generalizations.

Construcciones en inglés Jaime Garza Boreas, 1994-08 Shows how verbs in their many forms and tenses are used in conversation. Conversational texts, vocabulary lists, and exercises reinforce grammar skills.

La cuantificación lingüística en el inglés contemporáneo Francisco Fernández Fernández, Asunción Jaime Pastor, 2000

Construcciones con nexos relativos en el inglés contemporáneo José Manuel Oro Cabanas, 1989

Discourse Constructions in English Aneider Iza Erviti, 2021-05-29 This book emphasizes the advantages of examining discourse connectivity from a constructionist perspective and highlights the role of discourse configurations in the construction of meaning. The research contained advances the field of cognitive classification and categorization of discourse constructions. The text is a great improvement in the discourse analysis literature since it uniquely clarifies the subtleties of meaning between different discourse markers that are frequently treated as equivalent by lexicographers. It is unique in being the first contribution to the creation of a Constructicon at the discourse level and it fills an important gap within cognitively oriented constructionist accounts that have mostly restricted their analyses to argument structure and illocutionary constructions. This yearbook appeals to students and researchers working within corpus linguistics.
