Constructing Post-Soviet Geopolitics in Estonia Pami Aalto, 2013-09-13 This work examines the construction of post Soviet political space geopolitical discourses and boundaries in Estonia Making use of innovative methodological solutions such as Q methodology its analysis includes in depth interviews that elucidate a variety of issues through human experience and subjective perception such as Estonian Russian border disputes of the 1990s inter ethnic issues and national integration and security As Estonia is one of the frontline EU accession countries and is queuing for membership of NATO the book raises broad questions of post Soviet geopolitics in the Baltic region and across Europe Indeed Pami Aalto argues that small states such as Estonia should be understood as active participants in post Soviet and European geopolitics and not simply pawns in a superpower environment

European Union and the Making of a Wider Northern Europe Pami Aalto, 2006-09-27 This book is the first comprehensive study of how and why the European Union has enlarged to become northern Europe's leading power Pami Aalto presents a new approach to the under theorized field of EU foreign policy studies showing how since 1990 the EU has enlarged to include Finland Sweden Estonia Latvia Lithuania and Poland and also incorporated the former East Germany He also examines how this northern expansion has led the EU to reflect on relations with Russia and its north western regions This unique study includes a fresh approach to the under theorized field of EU foreign policy key empirical material including hundreds of documents interviews and field experiments in depth case studies of relations between the EU Nordic states Baltic states and Russia with its north western regions This is essential reading for all students of European politics Russian studies and international relations

Global and Regional Problems Vilho Harle, 2016-04-22 Distinctive due to explicit and systematically developed links between international relations IR and related disciplines this book addresses global and regional interactions and the complex policy problems that often characterise this agenda Such enhanced communication is crucial for improving the capacity of IR to engage with concrete issues that today are of high policy relevance for international organisations states diplomats mediators and humankind in general Whilst the authors do not reject the present IR they offer a wider research agenda with new directions intended not only for those IR scholars who are unsatisfied with the analytical power of the current discipline but also for those working on international foreign global or interregional issues in other disciplines and fields of research In this instance they pay particular attention to linking up with peace research international political economy IPE and cultural political economy CPE sociology political geography development studies linguistics cultural studies environmental studies and energy research gender studies and traditions of area studies

Russia's Energy Policies Pami Aalto, 2012-01-01 Russia is an increasingly important player in global energy markets yet its policies are under researched and little understood This collection represents an important and sophisticated contribution to the debate While much of the

commentary on Russian energy consists of generalizations about Russia's political strategy this work lifts the lid and looks inside the process through which Russian energy policies are designed and implemented It brings together essays by top specialists in the field and makes a conscious effort to integrate the various disciplines of politics economics and geography by developing a model of the cognitive frames through which the policy process is shaped It addresses both domestic and international dimensions of the problem and gives equal weight to traditional customers in Europe and new markets in Asia Peter Rutland Wesleyan University US The book explains Russian energy policies instead of a policy It portrays a picture with multiple policy drivers including institutional regional and federal environmental and commercial The study markedly improves our understanding of the multifaceted nature of Russian energy policy a topical and complex issue This is a highly commendable book that should be included in the reading lists of anyone with an interest in the role of energy in Russia's political economy or energy matters more generally Kim Talus University College London Australia Russia's vast energy reserves and its policies towards them have enormous importance in the current geopolitical landscape This important book examines Russia's energy policies on the national interregional and global level It pays particular attention to energy policy actors ranging from state federal and regional actors to energy companies and international financial actors and organizations The book models the formation of Russia's energy policies in terms of how energy policy actors perceive and map their policy environment The case studies cover federal regional and environmental aspects of Russian energy policy Russia's energy relations with Europe and the CIS North East Asia the globalization of Russian oil companies and the political economy of Russian energy It is found that there are several concurrent energy policies in contemporary Russia and that this situation is likely to continue These policies are conducted primarily from the business frame perspective while notions of energy superpower Russia are found more ambiguous Russia's Energy Policies will benefit advanced master's level students doctoral students researchers policy makers and practitioners The book will be a great resource for advanced international relations political economy international business and globalisation courses alongside energy policy courses as well as area studies courses on Russian post Soviet and European politics and environmental politics **Analysing**

Kazakhstan's Foreign Policy Luca Anceschi, 2020-03-16 This book investigates the roles that ideas and constructs associated with Eurasia have played in the making of Kazakhstan's foreign policy during the Nazarbaev era This book delves into the specific Eurasia centric narratives through which the regime headed by Nursultan Nazarbaev imagined the role of post Soviet Kazakhstan in the wider Eurasian geopolitical space Based on substantive fieldwork and sustained engagement with primary sources the book unveils the power implications of Kazakhstani neo Eurasianism arguing that the strengthening of the regime's domestic power ranked highly in the list of objectives pursued by Kazakhstani foreign policy between the collapse of the Soviet Union and Nazarbaev's apparent withdrawal from the Kazakhstani political scene 19 March 2019 This book ultimately is a study of inter state integration which makes use of a rigorous methodological approach to assess

different incarnations of post Soviet multilateralism from the Commonwealth of Independent States to the more recent and highly controversial Eurasian Economic Union This book offers a ground breaking analysis of Kazakhstani foreign policy in the Nazarbaev era It will be of interest to students and scholars of Central Asian Politics International Relations and Security Studies The European Union and Border Conflicts Thomas Diez, Mathias Albert, Stephan Stetter, 2008-03-27 It is generally assumed that regional integration leads to stability and peace This book is a systematic study of the impact of European integration on the transformation of border conflicts It provides a theoretical framework centred on four pathways of impact and applies them to five cases of border conflicts Cyprus Ireland Greece Turkey Israel Palestine and various conflicts on Russia's border with the EU The contributors suggest that integration and association provide the EU with potentially powerful means to influence border conflicts but that the EU must constantly re-adjust its policies depending on the dynamics of each conflict Their findings reveal the conditions upon which the impact of integration rests and challenge the widespread notion that integration is necessarily good for peace This book will appeal to scholars and students of international relations European politics and security studies studying European integration and conflict analysis *The Estonian Foreign Policy Yearbook* ,2004 Contemporary Change in Estonia Eglė Rindzevičiūtė, 2004 Selection of papers presented at the seminar Contemporary Change in Estonia held at the Baltic East European Graduate School S dert rns University College Huddinge April 2003 Rear cover *Bibliographic Index* ,2008 Forthcoming Books Rose Arny, 2003-04 *International Affairs* ,2003 **NewsNet** American Association for the Advancement of Slavic Studies, 2003 **Choice** ,2004 ICCEES International Newsletter ,2003 **The British National Bibliography** Arthur James Wells, 2004 **Constructing Post-Soviet Geopolitics in Estonia** Pami Aalto, 2001 **Environment and Planning** ,2004

International interdisciplinary journal discussing the relations between Society and Space Space is broadly conceived from landscapes of the body to global geographies from cyberspace to old growth forests as metaphorical and material as theoretical construct and empirical fact Covers both practical politics and the abstractions of social theory

Nation-Building and Minority Politics in Post-Socialist States David Galbreath, 2005-03-05 Despite socialism's best efforts ethnic identity remained a salient feature in Central and Eastern Europe Not only did ethno nationalism help to bring about the fall of the socialist regimes in this region but it also characterized much of the post socialist politics Nation Building and Minority Politics examines the issue of minority politics in post socialist states within this dual structure In particular it offers an in depth analysis of post restoration politics in Estonia and Latvia covering four issues First it looks at the historical context of the current group relations Second the study explores the domestic nature of minority politics in Estonia and Latvia by looking at domestic politics and policies Third it examines the role of the Russian Federation as an external national homeland through illustrating developments within Russian foreign policy Finally the book analyses the role of three significant European organizations namely the OSCE EU and the Council of Europe as agents of conditionality Overall this

study combines old and new theoretical approaches to nation building and minority politics to exhibit the changing nature of the relationship between majority minority external national homeland and international organizations in today s Europe
