## **Construction Communication:**

**Construction Communication** Stephen Emmitt, Christopher A. Gorse, 2009-02-12 Communicating the design intent from initial briefing through the design stage and on to the actual construction is vital to the success of any building project This book looks at communication across physical organisational and cultural barriers with a view to improving the design and construction process The authors investigate communication issues across physical organisational and cultural barriers and present clear guidance and practical advice

**Communication in Construction** Andrew Dainty, David Moore, Michael Murray, 2007-01-24 Communication within project based environments presents special challenges This is especially true within the construction industry where interaction tends to be characterised by unfamiliar groups of people coming together for short periods before disbanding to work on other endeavours This book examines communication at a number of levels ranging from interpersonal interactions between project participants to corporate communication between organizations Several non typical perspectives on the process of communication are introduced to encourage the reader to think about communication in a more innovative manner The combination of differing perspectives illustrates the diversity of communication problems facing those working within project based environments Practical guidance is provided on possible solutions to communication problems and a number of examples and case studies are presented

**Effective Construction Project Delivery** Titus Ebenezer Kwofie, Clinton Aigbavboa, Wellington Thwala, 2020-06-10 This book focuses on the development of communication skills in the context of non traditional procurement and construction projects It helps readers to understand the fundamentals of non traditional procurement and highlights the inherent communication challenges that arise as well as how to solve them The book is divided into four parts the first of which provides an introduction to communication discussing the theoretical concepts and contextual nature of communication as well as its benefits The second part goes into more depth discussing communication in the context of construction project delivery and non traditional procurement systems what these two terms actually mean and what effective communication looks like in these contexts Part III offers solutions to the inherent challenges of communication including the use of information and communications technology while the book s fourth and final part explores the future of construction communication Given the scope of its content the book represents a valuable asset for researchers professionals and students in the areas of procurement management and construction management

**Communication in Construction Teams** Stephen Emmitt, Christopher Gorse, 2006-09-27 Construction teams are usually complex interdisciplinary and temporary and as such the need for effective communication is crucial However published data regarding the manner in which individuals interact within the temporary project team is scarce with little other than anecdotal evidence available Recognizing this gap Communication in Construction Teams provides a comprehensive overview of the literature on interpersonal communication and delivers a critical review of various research methods previously used in and outside the construction management field

Making use of Bales interaction process analysis IPA a tool used successfully in many fields to collect interaction data the text investigates the link between successful projects and the effectiveness of communication finding that participants in the construction process exhibit regular patterns of interaction and most significantly that there are different patterns of interaction associated with successful and unsuccessful projects Putting forward a number of practical suggestions to assist all actors involved in construction projects this insightful publication will be of interest to researchers in the fields of building design and construction management

**Improving Construction Communication** Robert S. Done, 2004 The extensive use of roads and highways in the United States results in continuous maintenance and construction activities Work zones are inconvenient for motorists and dangerous for both motorists and transportation workers During the period 1997 2002 non construction highway fatalities remain about constant while highway construction zone fatalities increased by 70% The most common complaint about construction projects from the general public is the lack of information Improving communication with the public about construction conditions will allow drivers to make safer driving decisions and will increase their satisfaction with the construction process The safety and satisfaction of drivers is fundamental to the expansion and maintenance of transportation systems and research that improves that safety and satisfaction is vitally important This study explores the Arizona Department of Transportation ADOT construction communication process and how it can be improved This study examines data collected from ADOT customers during the State Route 51 SR 51 project During the 75 million project approximately 10 miles of SR 51 between Interstate 10 and SR 101 were renovated to include new high occupancy vehicle HOV lanes and rubberized asphalt Communication was measured by customer utilization of four direct communication channels and four indirect communication channels Satisfaction was measured by a composite score based on customer satisfaction with traffic dust noise signage and information during the construction process Almost all respondents relied upon at least one channel for construction communication and almost 80% of respondents reported using between one and three channels The most frequently utilized channel was construction signs 55 9% and the least frequently utilized channel was e mail alerts 1 5% Less than 4% of the respondents did not utilize any communication channel Direct communication channels resulted in higher customer satisfaction than did indirect communication channels Construction bulletins contributed the most to customer satisfaction followed by the project web site Neither television nor radio contributed to customer satisfaction As sources of project communication neighbors and friends had a strong but negative effect on customer satisfaction
