Constructions Of Disability Researching The Interface Between Disabled And Non Disabled People:

Constructions of Disability Claire Tregaskis, 2004 This innovative book discusses the meaning of inclusion through the exploration of the interactions between disabled and non disabled people at a community leisure centre and offers a wide range of practical suggestions for the future development

Constructions of Disability Claire Tregaskis, 2004-07-31 This innovative book discusses the meaning of inclusion through the exploration of the interactions between disabled and non disabled people at a community leisure centre By exploring the nature of this interface an understanding of how people create potential for both disability and inclusion is revealed This book takes a very different approach to that of existing texts which have tended to concentrate mainly on disabled people s exclusion The advantage of this new approach is that it adds an extra dimension to our understanding of how discriminatory practice is variously perpetuated and challenged

Constructions of Disability is valuable reading for all people who are working towards increased social inclusion for disabled people including theorists and students of disability studies and learning difficulty leisure management and disability service providers and their families Using a practical case study approach it explores the impact that social interaction between disabled and non disabled people can have increasing or decreasing disabled people s opportunities for inclusion Examples of both inclusive and discriminatory practice are described in detail and the positive and negative effects of these actions on the participants are demonstrated and discussed This insightful book offers a wide range of practical suggestions for the future development of more inclusive theory policy and practice

Disability Studies Colin Cameron, 2013-11-12 This textbook brings together a wide range of expert voices from the field of disability studies and the disabled people s movement to tackle the essential topics relevant to this area of study From the outset disability is discussed from a social model perspective demonstrating how future practice and discourse could break down barriers and lead to more equal relationships for disabled people in everyday life An interdisciplinary and broad ranging text the book includes 50 chapters on topics relevant across health and social care Reflective questions and suggestions for further reading throughout will help readers gain a critical appreciation of the subject and expand their knowledge This will be valuable reading for students and professionals across disability studies health nursing social work social care social policy and sociology

Youth and Disability Jenny Slater, 2016-02-11 In this ground breaking book Jenny Slater uses the lens of the reasonable to explore how normative understandings of youth dis ability and the intersecting identities of gender and sexuality impact upon the lives of young disabled people Although youth and disability have separately been thought within socio cultural frameworks rarely have sociological studies of youth and disability been brought together By taking an interdisciplinary critical disability studies approach to explore the socio cultural concepts of youth and disability alongside one another Slater convincingly demonstrates that youth and disability have been conceptualised within medical psychological frameworks for too long With chapters focusing on access and youth culture independence autonomy and disabled people s movements and the body

gender and sexuality this volume's intersectional and transdisciplinary engagement with social theory offers a significant contribution to existing theoretical and empirical literature and knowledges around disability and youth. Indeed, through highlighting the ableism of adulthood and the falsity of conceptualising youth as a time of becoming independent adult, the need to shift approaches to research around disabled youth is one of the main themes of the book. This book therefore is a provocation to rethink what is implicit about youth and disability. Moreover, through such an endeavour, this book sits as a challenge to Mr Reasonable.

Architecture's Disability Problem Wanda Katja Liebermann, 2024-06-21. *Architecture's Disability Problem* explores the intersection of architecture and disability in the United States from the perspective of professional practice. This book uncovers why, despite the profound effect of the Americans with Disabilities Act on the architectural profession, there has been so little interest in design for disability in mainstream architecture. To counter this, the book investigates alternative approaches to designing with disability through three case studies. These showcase both buildings and how design processes driven by disabled people shape design and professional roles. Combining historical research, formal and discourse analysis, and interviews with people who design, construct, use buildings, and advocate for access, the book develops a social understanding of how the buildings work at functional, affective, and symbolic levels. *Architecture's Disability Problem* is aimed at three primary readers: practicing architects, architectural scholars, and members of disability scholar/activist communities. Grounded in detailed design studies, the author hopes to unearth the social meaning-making of architecture related to disability. Ultimately, the book makes an argument for a focus on disability in its own right, as well as on the body in place of the dominance of formal, object-oriented approaches. This book presents and argues for a fundamental shift in the way architectural education, policy, and practice views and engages with disability. It will be key reading for students, researchers, practitioners, and policy makers.

Disability Hate Crime Leah Burch, David Wilkin, 2024-09-16. Bringing together perspectives from academics, practitioners, campaigners, and activists, this book explores the victimology of disability hate crime (DHC). For the first time, this book brings together recent academic thought, the stance of those working for the United Nations to further the rights of disabled people, and a helpful toolkit on how to advance the status of the disabled victim of hate crime. Campaigners, support workers, and legal scholars present a tangential approach to revealing the plight of disabled victims and their associates. The book will reveal the expertise required to understand experiences of victimisation and how to help reconstruct the lives of those affected by this type of violence. Never before has a book produced such a nuanced and multidisciplinary approach to discussing disability hate crime. This volume will be useful not only for those academically interested in how disability hate crime is perpetrated but also for scholars who wish to study how to raise awareness and lobby for change. It is essential reading for those engaged with hate studies, victimology, disability, and vulnerable communities, as well as practitioners and campaigners.
