Consumer Choice In Historical Archaeology:

Consumer Choice in Historical Archaeology S.M. SpencerWood,2013-06-29 Historical archaeology has made great strides during the last two decades Early archaeological reports were dominated by descriptions of features and artifacts while research on artifacts was concentrated on studies of topology technology and chronology Site reports from the 1960s and 1970s commonly expressed faith in the potential artifacts had for aiding in the identifying socioeconomic status differences and for understanding the relationships between the social classes in terms of their material culture An emphasis was placed on the presence or absence of porcelain or teaware as an indication of social status These were typical features in site reports written just a few years ago During this same period advances were being made in the study of food bone as archaeologists moved away from bone counts to minimal animal counts and then on to the costs of various cuts of meat Within the last five years our ability to address questions of the relationship between material culture and socioeconomic status has greatly expanded The essays in this volume present efforts toward measuring expenditure and consumption patterns represented by commonly recovered artifacts and food bone These patterns of consumption are examined in conjunction with evidence from documentary sources that provide information on occupations wealth levels and ethnic affiliations of those that did the consuming One of the refreshing aspects of these papers is that the authors are not afraid of documents and their use of them is not limited to a role of confirmation *The Archaeology of Wealth* James G. Gibb,2012-12-06 James G Gibb offers a unique study of 17th century English North American attitudes toward the acquisition and use of wealth He analyzes domestic sites excavated in Maryland and Virginia to interpret patterns in the construction of household identities and places these patterns within the social and cultural context of the region His work includes a new critical approach that underscores the role of conscious individual action in history and the importance of material culture in the construction of identities International Handbook of Historical Archaeology Teresita Majewski,David Gaimster,2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and

Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

Case Studies in Environmental Archaeology Elizabeth Reitz,C. Margaret Scarry,Sylvia J. Scudder,2008 This book highlights studies addressing significant anthropological issues in the Americas from the perspective of environmental archaeology The book uses case studies to resolve questions related to human behavior in the past rather than to demonstrate the application of methods Each chapter is an original or revised work by an internationally recognized scientist This second edition is based on the 1996 book of the same title The editors have invited back a number of contributors from the first edition to revise and update their chapter New studies are included in order to cover recent developments in the field or additional pertinent topics

Historical and Archaeological Perspectives on Gender Transformations Suzanne M. Spencer-Wood,2012-12-09 In many facets of Western culture including archaeology there remains a legacy of perceiving gender divisions as natural innate and biological in origin This belief follows that men are naturally pre disposed to public intellectual pursuits while women are innately designed to care for the home and take care of children In the interpretation of material culture accepted notions of gender roles are often applied to new findings the dichotomy between the domestic sphere of women and the public sphere of men can color interpretations of new materials In this innovative volume the contributors focus explicitly on analyzing the materiality of historic changes in the domestic sphere around the world Combining a global scope with great temporal depth chapters in the volume explore how gender ideologies identities relationships power dynamics and practices were materially changed in the past thus showing how they could be changed in the future

Advances in Archaeological Method and Theory Michael B Schiffer,2014-06-30 *Advances in Archaeological Method and Theory* Volume 11 is a collection of papers that discusses world systems theory modeling interregional interaction in prehistory and the archaeological analysis of ceramics Some papers review dating and weathering of inorganic materials strategies for paleo environmental reconstruction as well as deposits and depositional events One paper reviews the Old World state formation that occurred in West Asia during the fourth and third millennia B C Another paper examines the role of interactions among societies in the process of local social change and the need for archaeologists to develop a framework in which to analyze intersocietal interaction processes The presence of items such as ceramics is associated directly to factors of availability functions economic values or ethnic affiliation As an example one paper cites the use and misuse of English and American ceramics in archaeological analysis in identifying

cultural patterns and human behavior Another paper notes that each biological or mechanical agent of transport and deposition has its own respective attributes on a deposit where the attributes of sedimentary particles on the deposit can be defined From such definitions the archaeologists can make observations and inferences Sociologists anthropologist ethnographers museum curators professional or amateur archaeologists and academicians studying historical antiquities will find the collection very useful

An Archaeology of Nineteenth-Century Consumer Behavior in Melbourne, Australia, and Buenos Aires, Argentina Pamela Ricardi, 2019-07-23 This book compares consumer behavior in two nineteenth century peripheral cities Melbourne Australia and Buenos Aires Argentina It provides an analysis of domestic archaeological assemblages from two inner city working class neighborhood sites that were largely populated by recently arrived immigrants The book also uses primary historical documents to assess the place of these cities within global trade networks and explores the types of goods arriving into each city By comparing the assemblages and archival data it is possible to explore the role of choice ethnicity and class on consumer behavior This approach is significant as it provides an archaeological assessment of consumer behavior which crosses socio political divides comparing a site within a British colony to a site in a former Spanish colony in South America As two geographically politically and ethnically distinct cities it was expected that archaeological and archival data would reveal substantial variation In reality differences although noted were small Broad similarities point to the far reaching impact of colonialism and consumerism and widespread interconnectedness during the nineteenth century This book demonstrates the wealth of information that can be gained from international comparisons that include sites outside the British Empire

Historical Archaeology, 2000 **On the Periphery of the Periphery** Samuel Sweitz, 2011-11-17 This book examines from an archaeological perspective the social and economic changes that took place in Yucatán Mexico beginning in the 18th century as the region became increasingly articulated within global networks of exchange Of particular interest is the formation and ultimate supremacy of the hacienda system in Yucatán and the effect that new forms of capitalist organized production had on native Maya social organization Household archaeology and spatial analysis conducted on the grounds of the former Hacienda San Juan Bautista Tabi provides the data for analyzing the results of this change on the daily lives and existence of those individuals incorporated within the hacienda system The use of archaeological excavation to place the lives of local individuals within the context of larger global processes makes this book a worthy contribution to the study of archaeology

Transportation and Agricultural Changes in Blackbird Hundred Michael D. Scholl, Angela Hoseth, David J. Grettler, 1994 Contemporary and Historical Archaeology in

Theory Laura McAtackney, Matthew M. Palus, Angela Piccini, 2007 *Studies in Contemporary and Historical Archaeology 4*

Ontario Archaeology, 2007 **Archaeologia Polona**, 1991 **The Archaeology of Kentucky** David Pollack, 1990
