Graph Design for the Eye and Mind Stephen M. Kosslyn,2006-08-10 Graphs have become a fixture of everyday life used in scientific and business publications in magazines and newspapers on television on billboards and even on cereal boxes Nonetheless surprisingly few graphs communicate effectively and most graphs fail because they do not take into account the goals needs and abilities of the viewers In *Graph Design for Eye and Mind* Stephen Kosslyn addresses these problems by presenting eight psychological principles for constructing effective graphs Each principle is solidly rooted both in the scientific literature on how we perceive and comprehend graphs and in general facts about how our eyes and brains process visual information Kosslyn then uses these eight psychological principles as the basis for hundreds of specific recommendations that serve as a concrete step by step guide to deciding whether a graph is an appropriate display to use choosing the correct type of graph for a specific type of data and message and then constructing graphs that will be understood at a glance Kosslyn also includes a complete review of the scientific literature on graph perception and comprehension and appendices that provide a quick tutorial on basic statistics and a checklist for evaluating computer graphics programs *Graph Design for Eye and Mind* is an invaluable reference for anyone who uses visual displays to convey information in the sciences humanities and businesses such as finance marketing and advertising

Suntanning in 20th Century America Kerry Segrave,2005-09-14 The suntan experienced a profound change in the last century Considered a mark of the lower class for hundreds of years tanning became a fad in the early 1920s and remains popular today The tan though was much more than a matter of fashion enjoying at first a boost from the medical establishment Opinions ranging from hard science to quackery lauded the suntan as something of a panacea Near the end of World War II however researchers increasingly warned against the hazards of overexposure to the sun and a large new industry developed sunscreen Americans current paradoxical obsession with the tan developed almost entirely from the conflicting rays of twentieth century thought This history examines the twentieth century suntan as a social and scientific phenomenon Beginning with the years 1900 1920 it debunks the myth that changing attitudes toward the tan sprang largely from the world of fashion Initial pro tanning medical hype emerging negative opinions of sunbathing near the middle of the century the development of sunscreens the debate over sunscreen efficacy and the sunless tan are all covered here Numerous pictures demonstrate changing perceptions of the suntan displaying advertisements for products that promoted prevented or healed tans
