Consumer Services And Economic Development:

Consumer Services and Economic Development Colin C. Williams, 1997-04-17 Consumer Services have been viewed as parasitic activities dependent on other sectors of the economy for their viability and vitality Yet local economic policy is now looking towards consumer services to solve severe economic problems The rapid expansion of the service sector is now a principal feature of contemporary global economic restructuring

Consumer Services and Economic Development Colin C. Williams, 1997 Consumer Services and Economic Development evaluates the role of consumer services as motors for local economic development in contemporary advanced economies The contributions that specific consumer service industries are making to local economic development are analysed Tourism sports universities retailing and the cultural industries are each examined in turn Following this the roles that the consumer services sector are playing in economic regeneration are investigated in a number of different contexts a global city several contrasting urban areas and a rural locality In each case whether consumer services have taken a lead or supportive role in local economic development is surveyed and their effectiveness in promoting economic regeneration is evaluated This book dispels the common myth that consumer services are residual activities dependent upon other economic sectors for their vitality and viability Providing a comprehensive overview and evaluation of the contributions of the consumer services sector to economic development this book reveals the need for a fundamental reconceptualization of both the function of services in particular and economic development theory and practice more generally

Chinese Economic Development Yinxing Hong, Ninghua Sun, 2021-07-08 The book provides a meticulous analysis of economic development and concomitant problems in China since the late 1970s and advances suggestions on further economic modernisation and transition from both theoretical and practical angles Based on theories from development economics and solid empirical studies the authors two renowned Chinese economists provide a perceptive analysis of the Chinese development model in the post Mao era They shed light on questions that have perplexed many How can China sustain the rapid growth of the past 40 years Is there a unique China path to economic progress They argue compellingly that China's development model has to switch from a manufacturing driven one to a brand new approach centring on scientific and technical innovation and the integration of its existing economic structure into an increasingly complex global economy Such transformation will help overcome the middle income trap while addressing other institutional and economic challenges The book will appeal to students scholars and policymakers interested in the Chinese and global economies as well as transnational studies in the post COVID 19 world General readers willing to obtain a grasp of Chinese economic development from the insider's perspective will also find it useful

The Primary Sector in Economic Development (Routledge Revivals) Mats Lundahl, 2015-05-08 It is a major problem for less developed countries to make their primary sectors sufficiently profitable in order to be able to build up their manufacturing and service sectors This edited collection first published in 1985 examines the nature of the primary sector and its role in economic development Chapters
