Consumption Takes Time

Yiannis Gabriel, Tim Lang

Consumption Takes Time:

Consumption Takes Time Ian Steedman, 2001 Standard economic theory of consumer behaviour considers consumers preferences their incomes and commodity prices to be the determinants of consumption However consumption takes time and no consumer has more or less than 168 hours per week This simple fact is almost invisible in standard theory and takes the centre stage in this book Whether one is money rich but time poor or is money poor and killing time both money and time considerations matter Recognition that consumers are subject to both time and expenditure constraints makes a real difference to the economic theory

Long-run Growth, Social Institutions and Living Standards Neri Salvadori, Arrigo Opocher, 2014-05-14 This engaging book contains a set of original contributions to the much debated issues of long run economic growth in relation to institutional and social progress It explores the mutual relationships between living standards social habits education and

Recent Developments in Normative Trade Theory and Welfare Economics Binh Tran-Nam, Makoto Tawada, Masayuki Okawa, 2018-05-14 This volume examines important topical issues in normative trade theory and welfare economics In particular it seeks to investigate how far the potential gainfulness of international trade can be extended in an increasingly globalized world The first section focuses on the gains from trade in the presence of time consuming consumption and external increasing returns to scale which are often neglected in traditional trade theory The next section considers a range of issues that have practical and policy relevance including trade liberalization tax reform tourism and international migration The last section examines the impact of income transfers both from domestic and international perspectives and of economic policy making All chapters of the book are contributed by internationally well known researchers including Murray Kemp Henry Wan Ngo Van Long and some of Murray Kemp s many colleagues and former students around the world This book with its up to date information and analysis will be essential to academics and graduate students in the field of international economics Trade theorists in research institutions and practicing economists in governmental departments will also find this book of great interest

The Unmanageable Consumer Yiannis Gabriel, Tim Lang, 2006-04-07 This book was radically challenging when it was first published and is only more so today as the concept of consumer collapses under the weight of its many meanings Madeleine Bunting Columnist The Guardian Western style consumerism appears unstoppable Yet it is has failed to deliver greater happiness and is now facing major environmental population and political challenges This book examines the key Western traditions of thinking about and being a consumer Each chapter posits a consumer model with examples from the international community Readers are invited to enter an exciting and radical analysis of contemporary consumerism which suggests that consumerism is fragile and consumers unpredictable Updated with new material this Second Edition looks at the impact of new technologies on consumerism and the consolidation of consumerism and consumer language in spheres like education and health The authors discuss the spread of consumerism to developing countries like India and the effect of demographic change and migration The fallout

from 9 11 and United States military hegemony is examined as is the influence on consumerism of Islamic fundamentalism the anti globalization movement environmental concerns and depleting natural resources This book is of interest to advanced undergraduate postgraduate and MBA students taking courses on behaviour buyer behaviour customer behaviour consumers and society and retailing Any one interested in better understanding consumerism will also find this book a fascinating read

A Prehistory of Ordinary People Monica L. Smith,2021-11-23 For the past million years individuals have engaged in multitasking as they interact with the surrounding environment and with each other for the acquisition of daily necessities such as food and goods Although culture is often perceived as a collective process it is individual people who use language experience illness expend energy perceive landscapes and create memories These processes were sustained at the individual and household level from the time of the earliest social groups to the beginnings of settled agricultural communities and the eventual development of complex societies in the form of chiefdoms states and empires Even after the advent of civilization about 6 000 years ago human culture has for the most part been created and maintained not by the actions of elites as is commonly proclaimed by many archaeological theorists but by the many thousands of daily actions carried out by average citizens With this book Monica L Smith examines how the archaeological record of ordinary objects used by ordinary people constitutes a manifestation of humankind s cognitive and social development A Prehistory of Ordinary People offers an impressive synthesis and accessible style that will appeal to archaeologists cultural anthropologists and others interested in the long history of human decision making
