Container Gardening for Beginners Richard Cerot, 2020-06-14 Do you want a complete guide to grow vegetable herbs plants organic microgreens flowers in pots and containers at home If you want to know more keep reading Growing plants in containers is a unique way of gardening It is very fascinating because of the fact that the plants can be moved around for a change of pace and particular mood In recent years this concept has grown significantly Container gardening is well liked by gardeners who live in an area with restricted space or don t have the luxury of an outdoor garden Even the smallest space can hold a container garden a garden can be designed that will thrive no matter the space limitations no matter if you live in a condo in suburbia on a farm or in a high rise apartment without a patio Mobility is one great advantage but aside from that it is easy to remove or replace unsightly specimens This also helps eliminate overcrowding If you are entertaining you can arrange them in different parts of the home patio etc The colors and foliage can be mixed to create different patterns and effect Rare and unusual varieties that have special soil and light requirements can be more easily cared for Aside from the visual effects of container gardening there are other reasons which include yard conditions If you have ever had problems with termites or moles container gardening is certainly the key Having gardens too close to your houses is not a wise move because the water you use on them seeps down to your foundation and attracts termites For those of us that have small yards or live in apartments or town homes container gardening may be the right choice as well The book covers What Is Container Gardening Which Vegetables Can We Grow Decorative Plants Start Sowing Seed Starting and Re Potting Microgreens Growth Time of Microgreens Herbs What Do I Need for Container Herb Gardening Ornamentals Plants Variety of Ornamental Plants Different Varieties of Orchids Types of Bonsai Keeping the plants well fed is easier because they are kept

in a small confined area meaning all the nutrients will be absorbed solely by the plant itself Plants in the garden have other plants next to them that can share the nutrients It is a real time saver too With containers the watering feeding weeding and spraying is easy to do In places where watering is limited container gardening can also be the solution In areas where there are very hot and dry summers there can be drought and potted plants do not require as much water as a full garden planted in the yard In the North you can utilize tropical plants They can be potted and treated as summer specimens and then brought in for the winter Whether you have a small yard small patio or live in a high rise building with no yard or patio container gardening is only limited by your imagination Window boxes colorful barrels hanging baskets and large flowerpots are just some of the containers that can be used for this accomplishment The container gardener can be a luxurious and beautiful thing Click [BUY NOW](#) bottom
