

An abstract architectural drawing featuring a complex arrangement of geometric shapes, including cubes, rectangles, and cylinders, in shades of red, orange, and grey. These shapes are interconnected by thin, curved lines that create a sense of movement and depth. The background is dark, and the overall composition is dynamic and modern.

Architectural Study Drawings Daniel M. Herbert, 1993-06-15 Study drawings play a key role in the exploration and development of architecture in the early stages of design Yet these principal tools for graphic thinking have been largely taken for granted in the design professions This guide brings study drawings into the foreground by analyzing actual drawings used by architects past and present Architectural Study Drawings is the first source to provide a basis for understanding the primary means of graphic thinking used in the creation of these drawings It also explains versatile applications of these drawings in architectural practice teaching and research Evaluations of more than 80 drawings and diagrams demonstrate how study drawings are active participants in rather than passive records of the designer's graphic thinking The author probes characteristics and properties of study drawings in addition to how graphic and cognitive processes combine to guide design decision making Drawings of great past architects ranging from Leonardo da Vinci and Le Corbusier to Carlo Scarpa are analyzed Excerpts are included from recent interviews with five contemporary architects Joseph Esherick Helmut Jahn Robert Stern Stanley Tigerman and Peter Eisenman Readers will learn from these masters how to enhance the value of study drawings in various design situations Throughout the author clarifies how theoretical aspects of study drawings relate to actual design practice Detailed chapters discuss key topics such as The theoretical structure of study drawings Applications for handmade drawings How to make better use of current computer aided design CAD systems Examples of drafting room dialogue in practice that help improve design working processes Architectural Study Drawings offers valuable insights that can be applied on the drawing board in the school and office in teaching of both media and design and in research and development for CAD systems

Architectural Drawings as Investigating Devices Marianna Charitonidou, 2023-07-10 Architectural Drawings as Investigating Devices explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries It traces their transformations paying special attention to Le Corbusier and Ludwig Mies van der Rohe's preference for perspective representation to the diagrams of Team 10 architects to the critiques of functionalism and the upgrade of the artefactual value of architectural drawings in Aldo Rossi John Hejduk Peter Eisenman and Oswald Mathias Ungers and finally to the

reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture OMA Particular emphasis is placed on the spirit of truth and clarity in modernist architecture the relationship between the individual and the community in post war era architecture the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post autonomy era This book is based on extensive archival research in Canada the USA and Europe and will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics **Drawing on Architecture** Jordan

Kauffman, 2019-03-19 How architectural drawings emerged as aesthetic objects promoted by a network of galleries collectors and institutions and how this changed the understanding of architecture Prior to the 1970s buildings were commonly understood to be the goal of architectural practice architectural drawings were seen simply as a means to an end But just as the boundaries of architecture itself were shifting at the end of the twentieth century the perception of architectural drawings was also shifting they began to be seen as autonomous objects outside the process of building In *Drawing on Architecture* Jordan Kauffman offers an account of how architectural drawings promoted by a network of galleries and collectors exhibitions and events emerged as aesthetic objects and ultimately attained status as important cultural and historical artifacts and how this was both emblematic of changes in architecture and a catalyst for these changes Kauffman traces moments of critical importance to the evolution of the perception of architectural drawings beginning with exhibitions that featured architectural drawings displayed in ways that did not elucidate buildings but treated them as meaningful objects in their own right When architectural drawings were seen as having intrinsic value they became collectible and Kauffman chronicles early collectors galleries and sales He discusses three key exhibitions at the Leo Castelli Gallery in New York other galleries around the world that specialized in architectural drawings the founding of architecture museums that understood and collected drawings as important cultural and historical artifacts and the effect of the new significance of architectural drawings on architecture and architectural history Drawing on interviews with more than forty people directly involved with the events described and on extensive archival research Kauffman shows how architectural drawings became the driving force in architectural debate in an era of change **Contemporary Architects** Muriel Emanuel, 2016-01-23
