Contemporary American Thought:

Visual Subjectivity in Chinese and American Thought and Literature Guozhong Duan, Ming Dong Gu, 2025-10-15 Providing the reader with a systematic study of visual subjectivity in comparative thought and literature this book analyses the role that vision and visibility especially interpersonal visibility plays in the constitution of subject and subjectivity in Chinese and American traditions Examining the formation of visual subjectivity in the philosophical works by major Chinese and Western thinkers this book provides a comparative study of four masterworks of Chinese and American fiction focusing on *The Plum in the Golden Vase* *The Story of the Stone* *Moby Dick* and *The Scarlet Letter* It demonstrates that there are both psychologically universal and culturally specific factors and features in the visual constitution and representation of self identity subject and subjectivity Offering fresh insights for cross cultural studies of intellectual thought literature ideology and culture through the visual lens this book will appeal to students and scholars engaged in comparative studies of Chinese and American thought literature and narrative theory *Astrofuturism* De Witt Douglas Kilgore, 2003 This is an exceptionally innovative and potentially invaluable exploration of a major cultural phenomenon of our epoch H Bruce Franklin Rutgers University **American Thought and Culture in the 21st Century** Martin Halliwell, 2008-10-07 Will the twenty first century be the next American Century Will American power and ideas dominate the globe in the coming years Or is the prestige of the United States likely to crumble beneath the pressure of new international challenges This ground breaking book explores the changing patterns of American thought and culture at the dawn of the new millennium when the world's richest nation has never been more powerful or more controversial It brings together some of the most eminent North American and European thinkers to investigate the crucial issues and challenges facing the United States during the early years of our new century From the subterranean political shifts beneath the electoral landscape to the latest biomedical advances from the literary response to 9 11 to the rise of reality television this book explores the political social and cultural contours of contemporary American life but it also places the United States within a global narrative of commerce cultural exchange i **Think Tanks in the US and EU** Christopher Rastrick, 2017-07-20 Why do US and EU think tanks diverge in their roles priorities and main constituencies Providing the first substantive analytical comparison of think tanks in Washington and Brussels this book explores the differences that exist and why they developed Two principal variables are identified institutional credibility and political culture as a measure of comparison between the two think tank models Supranational think tanks have an inherent credibility with the institutions of the EU which allows them to direct their resources and efforts to activities and outputs where they hold a comparative advantage US think tanks lack such institutional recognition and so need to prove their credibility to their main constituencies The result is that an adversarial and individualistic political culture has informed the norms and activities of Washington think tanks while the consensus driven and collectivist political culture of Europe has influenced supranational think tanks Think tanks are far from

newcomers to the public policy scene but our broader understanding of their role structure and how they assess their own achievements is not yet fully developed By providing a framework within which to analyse this this book will be of interest to academics students and policy experts working within public policy comparative politics and political science more generally
