Contemporary Approaches to Neuropsychological Assessment Gerald Goldstein, Theresa M. Incagnoli, 2013-06-29 This volume reflects in part an update of Clinical Application of Neuropsychological Test Batteries edited by Theresa Incagnoli Gerald Goldstein and Charles Golden some 10 years ago While the initial concept of the present editors involved doing a straightforward update of each chapter it soon became apparent that the field of clinical neuropsychology had changed so dramatically and rapidly that substantial changes in the outline had to be made It was our view that sufficient interest remained in the standard comprehensive neuropsychological test batteries to make an update worthwhile We asked four senior people to take on this assignment James Moses Jr and Arnold Purisch in the case of the Luria Nebraska Battery and James Reed and Homer Reed for the Halstead Reitan Battery These individuals all have long term associations with these procedures and can be viewed as pioneers in their development However it also seemed to us that there was an increasing interest in the psychometric aspects of the standard procedures and in assessment issues related to the relative merits of using standard or individualized assessment strategies Thus we have chapters by Elbert Russell and Gerald Goldstein that provide discussions of these current methodological and clinical issues During the past 10 years the cognitive revolution has made a strong impact on neuropsychology The interest of cognitive psychologists in brain function has increased

dramatically and we now have an active field of cognitive neuropsychology something that was only beginning 10 years ago

Mastering Modern Psychological Testing Cecil R. Reynolds, Robert A. Altmann, Daniel N. Allen, 2021-05-13
This book provides a comprehensive introduction to psychological assessment and covers areas not typically addressed in existing test and measurements texts such as neuropsychological assessment and the use of tests in forensics settings. The book introduces the vocabulary of the profession and the most basic mathematics of testing early as being fundamental to understanding the field. Numerous examples are drawn from tests that the authors have written or otherwise helped to develop reflecting the authors' deep understanding of these tests and their familiarity with problems encountered in test development, use, and interpretation. Following the introduction of the basic areas of psychometrics, the book moves to areas of testing that represent various approaches to measuring different psychological constructs: memory, language, executive function, etc., with emphasis on the complex issue of cultural bias in testing. Examples of existing tests are given throughout the book; however, this book is not designed to prepare students to go out and administer, score, and interpret specific psychological tests. Rather, the purpose of this book is to provide the foundational core of knowledge about tests, measurement, and assessment constructs, issues, and quantitative tools. Explains what constitutes a psychological test, how tests are developed, how they are best used, and how to evaluate their strengths and weaknesses. Describes areas of testing that represent different approaches to measuring different psychological constructs. Explains applications of psychological testing to issues in the courts. Addresses how test authors and publishers design and research tests to address the difficult and demanding issues of cultural differences in test performance and interpretation of test results.

Contemporary Approaches to the Study of Hysteria Peter Halligan, Christopher Bass, John C. Marshall, 2001
Patients with striking symptoms which have no discernible physical cause are typically labelled as suffering from hysterical conversion. This book covers aspects neglected by previous works on this controversial condition, moving away from traditional historical/sociological accounts towards neuroscientific theories about the causes and categorization of hysteria. Importantly, it also covers medico-legal aspects, prognosis, treatment, and rehabilitation.
