Constable Graham Reynolds, 1965 *John Constable* Graham Reynolds, 1973 **Constable** Graham Reynolds, 1976 A study of the life and work of the most natural painter of the English countryside *John Constable*, 1973 **John Constable, the Natural Painter** John Constable, Graham Reynolds, 1973 *Constable* Jonathan Clarkson, 2010-10-20 This lavishly illustrated monograph of the great British landscapist John Constable 1776 1837 presents a definitive survey of the painter's life and works Jonathan Clarkson offers a comprehensive assessment of Constable's oeuvre from his earliest line drawings to his last masterpieces including pencil drawings quick outdoor oil sketches painstakingly worked studio canvases and less well known portraits Born the son of a miller merchant and gentleman farmer in the small village of East Bergholt Suffolk it was not immediately obvious that John Constable would pursue a career in the art world However the young Constable became a keen amateur landscape painter inspired by the rural surroundings of his beloved Bergholt home With the encouragement of local wealthy connoisseur Sir George Beaumont whose collection introduced the artist to such masters of landscape as Claude Lorrain and an allowance from his father Constable was admitted to the Royal Academy Schools London in 1799 There he studied the work of such masters as Lorrain Gainsborough and Ruisdael and developed his own style of meticulous observation of natural detail combined with contemporary artistic theory Upon leaving the Academy Constable rejected a financially rewarding position as a drawing master in favor of sketching and painting in the English countryside for nearly ten years He spent his time in pursuit of an honest yet coherent and dignified natural style and pioneered the revolutionary practice of making finished paintings outdoors direct from nature Commercial success came with Constable's decision to exhibit large works at the British Institution These six footers which secured his position among the greatest British painters of his age included such enduringly famous canvases as *The Hay Wain* In this new monograph Clarkson looks at these grand paintings with a fresh view investigating what we can actually see in them Set against the rapidly changing way of life in nineteenth century Britain Constable's paintings are both portraits of a disappearing world and reflections of his belief that painting is a science and should be pursued as an inquiry into the laws of nature Since his death Constable has been condemned for presenting a willfully inauthentic vision of the early nineteenth century English countryside which was ravaged by unemployment crime and intense poverty in the years following the Napoleonic wars However his importance for Realism and for painting as a practice in itself cannot be underestimated Clarkson draws attention to Constable's direct influence on landscape painters as well as figurative artists from his own time to the present citing examples such as Lucien Freud and Frank Auerbach *Artist's Series: John Constable* Tate Publishing, 2024-04-04 An indispensable introduction to the life and work of John Constable highlighting key aspects of his innovative practice and the ways in which he brought a new vivacity to the observation of nature in nineteenth century art Tate Publishing **Tate British Artists** William Vaughan, 2002 Constable is one of the best known and most popular of British painters His fresh

depictions of the English countryside have often been taken as the genuine and most authentic record of his native land Yet there is far more to Constable than the celebration of local scenery This book draws on recent research to show how profound the artist's perception of nature was and how innovative he was as a painter **John Constable** Arthur Bensley Chamberlain, 1909 **John Constable** Anthony Bailey, 2012-03-31 Born in 1776 in East Anglia near the river Stour John Constable was destined for his father's business of milling and grain shipping But he was obdurately opposed to this and persuaded his family he should become an artist instead In the same determined spirit he wooed Maria Bicknell in the teeth of opposition from her formidable grandfather and persisted in painting landscapes at a time when history paintings and portraits were the fashion Sometimes sharp and sarcastic and often depressed Constable in fact possessed a warm gift for intimate friendship This is revealed in his letters to John Dunthorne village handyman and housepainter and to his best friend and patron archdeacon John Fisher to whom he wrote I have a kingdom of my own both fertile and populous my landscape and my children In recent times after a period of relative ignominy Constable's influence on British landscape painting has been re acknowledged he has been more widely exhibited and his reputation has been reestablished as one of the masters of his genre This important and absorbing biography explores his life and work and highlights the dramatic tension between the two *The Art of Seeing Nature* Lowell Libson, Johnny Yarker, 2018 *Tate British Artists: John Constable* William Vaughan, 2016-05-03 John Constable 1776 1837 is best known for his idyllic paintings of the English countryside Yet he was also a brilliant innovator who brought a new vivacity to the observation of nature He practiced oil painting in the open air capturing in particular the effervescent effects of atmospherics as can be seen for example in his wonderful studies of clouds His art became a benchmark for naturalist painters throughout Europe and America in the 19th century and he continues to be one of the most popular and influential artists today This book draws extensively on the artist's own correspondence to provide a fresh understanding of his artistic aims and achievements and reassesses his role in the development of modern art

John Constable - CLOUDS IN PAINTINGS & SKETCHES E. L. Helton PhD, 2021-12-15 Born in East Bergholt Suffolk on 11 June 1776 Constable was the second son of the six children of Golding Constable and Ann Watts He was educated at a private school in Lavenham and at the grammar school in Dedham subsequently joining the family business of which it was intended he would succeed as manager He learned the technique of painting from John Dunthorne a local plumber and glazier who was an amateur painter and was encouraged by Sir George Beaumont Staying with relatives at Edmonton in 1796 he met John Cranch a mediocre artist whose style he imitated and John Thomas Smith the antiquarian draftsman with whom he made drawings of picturesque cottages In 1799 his father gave him an allowance to enter the Royal Academy Schools reluctantly consenting in 1802 to his becoming a professional painter That same year Constable showed his first landscape at the Academy where he was to exhibit nearly every year until his death and acquired a studio opposite the family house He spent summers in East Bergholt sketching from nature until 1817 in the autumn of 1806 he made a two month visit

to the Lake District In 1809 Constable met and fell in love with Maria Bicknell but he was unable to marry her until 1816 owing to the opposition of Maria s grandfather After the marriage the couple lived in London first on Keppel Street then after 1822 on Charlotte Street The marriage which was the prelude to Constable s finest work was a deeply happy one and there were seven children to whom the artist was devoted Maria s health was far from robust however and she died in 1828 a blow from which Constable never fully recovered

"Art, Technology and Nature " CamillaSkovbjerg Paldam,2017-07-05 Since 1900 the connections between art and technology with nature have become increasingly inextricable Through a selection of innovative readings by international scholars this book presents the first investigation of the intersections between art technology and nature in post medieval times Transdisciplinary in approach this volume s 14 essays explore art technology and nature s shifting constellations that are discernible at the micro level and as part of a larger chronological pattern Included are subjects ranging from Renaissance wooden dolls science in the Italian art academies and artisanal epistemologies in the followers of Leonardo to Surrealism and its precursors in Mannerist grotesques and the Wunderkammer eighteenth century plant printing the climate and its artistic presentations from Constable to Olafur Eliasson and the hermeneutics of bioart In their comprehensive introduction editors Camilla Skovbjerg Paldam and Jacob Wamberg trace the Kantian heritage of radically separating art and technology and inserting both at a distance to nature suggesting this was a transient chapter in history Thus they argue the present renegotiation between art technology and nature is reminiscent of the ancient and medieval periods in which art and technology were categorized as aspects of a common area of cultivated products and their methods the Latin ars the Greek techne an area moreover supposed to imitate the creative forces of nature
