The Encyclopedia of the Industrial Revolution in World History Kenneth E. Hendrickson III,2014-11-25 As editor Kenneth E Hendrickson III notes in his introduction Since the end of the nineteenth century industrialization has become a global phenomenon After the relative completion of the advanced industrial economies of the West after 1945 patterns of rapid economic change invaded societies beyond western Europe North America the Commonwealth and Japan In The Encyclopedia of the Industrial Revolution in World History contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to Western society The Encyclopedia of the Industrial Revolution in World History is a three volume work of over 1 000 entries on the rise and spread of the Industrial Revolution across the world Entries comprise accessible but scholarly explorations of topics from the aerospace industry to zaibatsu Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization Entries include generous selections of biographical figures and human communities with articles on entrepreneurs working men and women families and organizations They also cover legal developments disasters and the environmental impact of the Industrial Revolution Each entry also includes cross references and a brief list of suggested readings to alert readers to more detailed information The Encyclopedia of the Industrial Revolution in World History includes over 300 illustrations as well as artfully selected extended quotations from key primary sources from Thomas Malthus Essay on the Principal of Population to Arthur Young s look at Birmingham England in 1791 This work is the perfect reference work for anyone conducting research in the areas of technology business economics and history on a world historical scale

Confucian Constitutionalism in East Asia Bui Ngoc Son,2016-02-12 Western liberal constitutionalism has expanded recently with in East Asia the constitutional systems of Japan South Korea and Taiwan based on Western principles and with even the socialist polities of China and Vietnam having some regard to such principles Despite the alleged universal applicability of Western constitutionalism however the success of any constitutional system depends in part on the cultural values customs and traditions of the country into which the constitutional system is planted This book explains how the values customs and traditions of East Asian countries are

Confucian and discusses how this is relevant to constitutional practice in the region The book outlines how constitutionalism has developed in East Asia over a long period considers different scholarly work on the ease or difficulty of integrating Western constitutionalism into countries with a Confucian outlook and examines the prospects for such integration going forward Throughout the book covers detailed aspects of Confucianism and the workings of constitutions in practice

Christian Advocate and Journal and Zion's Herald ,1912 Power by Design Suisheng Zhao,1995-12-01 First established as a cabinet system in Guangzhou in 1925 the Nationalist Government of China was replaced three years later by a presidential system under a unified Nationalist government in Nanjing The cabinet government was restored in 1931 and existed until the presidential system was again installed by the 1936 constitution Why did presidential and cabinet systems exist alternately during this formative period of the Nationalist government Why was the presidential system finally adopted in 1936 Suisheng Zhao answers these and other questions fundamental to understanding authoritarian regimes in this pioneering study of the design of the Nationalist Government of China from 1925 to 1937 although scholars of comparative politics have shown great interest in the institutional choice between parliamentarianism and presidentialism in democratic countries they have paid little attention to the study of constitutional frameworks in authoritarian settings By offering a clear and original re interpretation of the history of this power struggle between Chiang Kai shek and his rivals over institutional design Zhao challenges the conventional wisdom that has underestimated the importance of formal institutions in non democratic regimes Borrowing ideas from public choice theory Zhao proposes that political actors who design governmental institutions are driven by power maximization strategies just as business firms are driven by wealth maximization strategies Constitution making reflects the underlying distribution of power among authoritarian leaders who attempt to design political institutions that will consolidate their personal power and position Thus Zhao argues if political actors possess more power resources than their rivals and anticipate themselves becoming dominant they will choose the singular leadership of the presidential system If they are in a weaker position and do not anticipate becoming dominant they will prefer the collective leadership of the cabinet form of government Notable for its persuasive integration of political science theory and the historical evidence Power by Design is an insightful re interpretation of Chinese history that will be welcomed by scholars of modern China and those interested in the consequences of the nationalist politics that continue to reverberate in contemporary China as well as by comparative political scientists studying constitution making and institutional design
