Constraints On Pulaar Phonology:

Constraints on Pulaar Phonology Mamadou Ousmane Niang, 1996 Constraints in Pulaar Phonology provides clear and convincing analyses and solutions to linguistic phenomena whose treatment in the literature remained unsatisfactory until now An analysis of the metrical structure and other morphological and phonological processes in Pulaar shows the need for further distinctions beyond the generally admitted binary ones The argument is supported by various processes that obtain in Pulaar a dialect of Fula a language of the West Atlantic Branch of the Niger Congo Language Family The analyses adopted show Pulaar not only breaks this binary distinction but also makes a four way weight distinction in contrast to other views according to which only a two way weight distinction prevails in languages The analysis of the metrical system of Pulaar shows that stress assignment is sensitive to the sonority hierarchy of the syllables in the word Four sonority levels CV

Beyond Markedness in Formal Phonology Bridget D. Samuels, 2017-11-16 In recent years an increasing number of linguists have re examined the question of whether markedness has explanatory power or whether it is a phenomenon that begs explanation itself This volume brings together a collection of articles with a broad range of critical viewpoints on the notion of markedness in phonological theory The contributions span a variety of phonological frameworks and relate to morphosyntax historical linguistics neurolinguistics biolinguistics and language typology This volume will be of particular interest to phonologists of both synchronic and diachronic persuasions and has strong implications for the architecture of grammar with respect to phonology and its interfaces with morphosyntax and phonetics

Input-based Phonological Acquisition Tania Zamuner, 2004-11-23 This book provides an analysis of two theories of language acquisition the theory that acquisition is primarily mediated by innate properties of language provided by universal grammar and the opposing theory that language is acquired based on the patterns in the ambient language A problem not often considered is that these two theories are confounded because the structures that are frequent across languages are also typically the most frequent within a specific language In addition the innate theory of language acquisition is difficult to quantify and qualify Using cross linguistic corpus and experimental approaches this book attempts to contrast these theories through an

examination of the acquisition of word final consonants in English *Lexical Phonology and Morphology* Carole Paradis, 2014-02-03 This book presents a description of the phonology and morphology of the nominal class system in Fula a dialect which displays 21 nominal classes These are identified by suffixes which can attach to nominal verbal and adjectival stems The main objective of this work is to show through a lexical analysis that there are only two monomorphemic marker variants and that the distribution of these variants is predictable **The Multilingual Apple** Ofelia García, Joshua A.
