global security management However the idea of a system of global security management is a remote prospect because divergence seems to be as important as commonality in terms of regional security In light of the above Regional Organisations and Security analyses the primary ROs that are active in Africa Asia Eurasia the Middle East and South America The findings of individual case studies are compiled to highlight disparities and similarities in how security is seen prioritised understood practised managed and implemented across regions On this basis the authors reach conclusions about whether we live in an increasingly globalised or regionally distinct world and go on to assess the prospects for a globalised system of security management and consider how this might be developed and organised This book will be of interest to students of comparative regionalism international organisations international security and IR

**Enacting the Security Community** Stéphanie Martel, 2022-07-12 Enacting the Security Community illuminates the central role of discourse in the making of security communities through a case study of the Association of Southeast Asian Nations ASEAN Despite decades of discussion scholars of political science and international relations have long struggled to identify what kind of security community ASEAN is striving to become Talk about security Stéphanie Martel argues in this innovative study is more than empty rhetoric It is precisely through discourse that ASEAN is brought into being as a security community Martel analyzes the epic narratives that state and non state actors tell about ASEAN's journey to becoming a security community featuring a colorful cast of heroes and monsters Chapters address a wide spectrum of current regional security concerns from the South China Sea disputes to the Rohingya crisis and nontraditional challenges like natural disasters and pandemics Through fieldwork and in depth interviews with practitioners Martel provides clear evidence that discourse is key to sustaining regional organizations like ASEAN Enacting the Security Community is an incisive contribution to debates among scholars and practitioners about security communities as well as the role of discourse in the study of world politics and essential reading for students of Southeast Asian international relations politics and security

**Asian Security and the Rise of China** David Martin Jones, Michael Lawrence Rowan Smith, Nicholas Khoo, 2013-01-01 Khoo Jones and Smith have pulled off a remarkable balancing act crafting a well grounded and multifaceted survey of China's rise in the context of Asian security In a field which is often marked more by scholarly effervescence than substance the authors provide a refreshingly detailed portrait of the last two decades and fairly minded point out evidence which might support both extremes of the debates they challenge with their own third way Frank Scott Douglas US Naval War College US Congratulations to the authors for a clearly argued and comprehensive treatment of China's post Cold War rise and what it means for existing and future dynamics of the Asia Pacific region Effectively employing realist theory in a fairly minded treatment of regional developments the volume shows how and why power realities are more important than non material factors in determining the region's trajectory and thereby demonstrates that China's ascendance in Asia remains complicated and conflicted Robert Sutter George Washington University US East Asia is without question a region of huge economic political and security significance

Asian Security and the Rise of China offers a comprehensive overview and assessment of the international politics of the Asia Pacific since the end of the Cold War seeking to address the overarching question of how we can most convincingly explain the central dynamics of Asia's international relations. Via a realist perspective on the dynamics and frictions associated with accommodating the rise of powerful states, this timely book addresses the core issue in contemporary Asian politics: the rise of China. The contributors expertly evaluate China's rise and the impact it has had on the dynamics of regional relations in North East and South East Asia. It demonstrates that China's economic development and its regional and international ambition increasingly conflict with the existing consensus-based regional arrangements like the ASEAN Regional Forum and the East Asian Summit mechanism. As a consequence, smaller states in the region increasingly resort to hedging and balancing strategies in an attempt to mitigate Chinese hegemony. This leaves the region in the grip of a complex and potentially destabilizing security dilemma. The book offers a compelling analysis of the problem that China presents for its region that will enlighten undergraduate students of regional political studies and international relations. Postgraduate and Master's students on courses addressing East and South East Asia will also find plenty of information in this invaluable book.

**ASEAN Regionalism** Christopher B. Roberts, 2012-03-15. This book examines the key motivations for and challenges to greater regional integration in Southeast Asia. It demonstrates how security and economic concerns, domestic regional and international, have either contributed to or detracted from an increased level of unity and cooperation in ASEAN. It also explores how the patterns of interaction and socialization generated by these issues, together with the nature of domestic political systems, have affected the emergence of common values, norms and interests. It covers the full range of issues confronting ASEAN at present and the full range of ASEAN countries and discusses both developments in ASEAN to date and also likely future developments.

*The New Global Politics of the Asia-Pacific* Michael K. Connors, Rémy Davison, Jörn Dosch, 2017-10-30. Now in its new and fully updated third edition, *The New Global Politics of the Asia-Pacific* continues to provide a compelling analysis of a region undergoing dramatic changes. Based on new research and offering fresh interpretation, this edition evaluates the prospects for continuing US dominance in the Asian Century. Whilst presenting evidence for a multifaceted Beijing Strategy which aims to counter the US by building an alternative regional order, it also explains Japan's definitive departure from its limited military role. Providing an introductory guide for the main frameworks needed to understand the region, including realism, liberalism and critical theory, this new edition is reader-friendly and offers sophisticated competing explanations. Key content includes intra-regional conflicts in the South China Sea and the Korean peninsula; the different responses within the Asia-Pacific to the globalization of Western ideas of democracy and political economy; the underappreciated success of the Association of Southeast Asian Nations in building a regional identity; the European Union's soft power in the region; a highly topical account which offers an overview of the main actors, institutions and contemporary issues in the Asia-Pacific. The book will be essential reading for undergraduate students of Asian Studies.
