Constructing Global Civil Society Power And Morality In International Relations:

Constructing Global Civil Society D. Chandler, 2004-09-13 Global Civil Society is a crucial concept in International Relations today used as both a description of new mechanisms of non state actor and NGO engagement in international policy making and as a normative political project of international change David Chandler critically investigates the claims made by the advocates of global civil society analyzing the limits of the concept as a way of describing actual policy processes and the political dynamics behind the search for an international source of collective ethical values and social change

A Foucauldian Approach to International Law Leonard M. Hammer, 2016-03-23 Foucault's challenging view of power and knowledge as the basis for interpreting the international system forms the central themes of this book As the application of international law expands and develops this book considers how Foucault's approach may create a viable framework that is not beset by ontological issues With International law essentially stuck within an older framework of outmoded statist approaches and overly broad understanding of the significance of external actors such as international organizations current interpretations are either rooted in a narrow attempt to demonstrate a functioning normative structure or interpret developments as reflective of some emerging and somewhat unwieldy ethical order This book therefore aims to ameliorate the approaches of a number of different schools within the disciplines of international law and international relations without being wedded to a single concept Current scholarship in international law tends to favour an unresolved critique a utopian vision or to refer to other disciplines like international relations without fully explaining the significance or importance of taking such a step This book analyses a variety of problems and issues that have surfaced within the international system and provides a framework for consideration of these issues with a view towards accounting for ongoing developments in the international arena

Intending the World Ralph Pettman, 2008-03-15 How we look at the world is informed mainly by our assumptions and the ways in which we

rationalise them Seldom do we rely or allow ourselves to rely on gut thinking or intuition Intending the World shows how rationalism which is our primary approach in thinking about world affairs is in crisis By studying the world rationally we objectify it and we look at it as detached from ourselves But in doing so we cease to see that we are using a perspective that limits as well as enlightens In a disciplinary first Ralph Pettman provides an account of twenty first century international relations in terms of phenomenology one of the main philosophical attempts to compensate for these limits He explores how this re embedded use of reason can successfully describe and explain world affairs in ways unused by rationalists Intending the World follows the lead of the German philosopher Edmund Husserl It looks at the world not only in terms of things in themselves but also in terms of why it is we keep willing the world the way we do Humanitarian Intervention After Kosovo Aidan Hehir,2008-10-09 A critical analysis of the record of global civil society and the normative thesis since NATO s intervention in Kosovo The book advances a new direction for the humanitarian intervention debate Empire in Denial David Chandler,2006-07-20 Ideal for students of international affairs this book takes a critical look at state building

in fractured communities around the world **Sociedades complejas, modernidades y globalización** Oscar Mejía Quintana, 2009 The Idea of Global Civil Society Randall Germain, Michael Kenny, 2004-08-02 This book evaluates the claim that in order to explore the changing social foundations of global power relations today we need to include in our analysis an understanding of global civil society particularly if we also wish to raise ethical questions about the changing political and institutional practices of transnational governance Bridging the normative concerns of political theorists with the historical and institutional focus of scholars of international relations and international political economy this book is of broad interest to students and researchers concerned with international relations civil society global governance and ethics

Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur , 2004 **The Gazette of the Incorporated Law Society of Northern Ireland** , 1964 **The Living Church** , 1913 **Christian Register and Boston Observer...** , 1900 **From Kosovo to Kabul and Beyond** David Chandler, 2005-12-20 This new and updated edition of David Chandler's acclaimed book takes a critical look at the way in which human rights issues have been brought to the fore in international affairs The UN and Nato's new policy of interventionism as shown in Iraq Somalia Bosnia Kosovo and East Timor has been hailed as part of a new ethical approach to foreign policy David Chandler offers a rigorous critique of this apparently benign shift in international relations to reveal the worrying political implications of a new human rights discourse He asks why the West can now prioritise the rights of individuals over the traditional rights of state sovereignty and why this shift has happened so quickly Charting the development of a human rights based foreign policy he considers the theoretical problems of defining human rights and sets this within the changing framework of international law Meticulous and compelling From Kosovo to Kabul and Beyond offers a disturbing insight into the political implications of a human rights led foreign policy and the covert agenda that it conceals **Review of International Studies** , 2005
