Construction For Profit:

Profit First for Contractors Shawn Van Dyke, 2018-12-03 Construction industry business coach speaker and author Shawn Van Dyke has taken the core concepts of Mike Michalowicz's Profit First and customized them to address the specific needs of the construction industry Profit First for Contractors addresses the major struggles contractors face and provides clear and actionable guidance on how to overcome them Shawn shows contractors how to go from simply getting by to becoming permanently profitable This book is for every construction business owner who dreams of prosperity Using Van Dyke's Profit First for Contractors system readers will learn how to break out of the craftsman cycle the seemingly never ending loop of urgent tasks and responsibilities that keep contractors from gaining traction toward their important goals He guides construction business owners how to understand their financial statements and how to use them to determine the markup and margin that lead to profits You will also learn how to develop solid rules of thumb for the operation of your construction businesses and how to implement an effective cash management plan that simplifies accounting and leverages normal human behavior Using real life stories from actual construction business owners step by step advice and his conversational twang Van Dyke puts permanent profitability within reach of every construction business owner

Construction for Profit Kenneth O. Gooch, John Caroline, 1980 *A Simple Guide to Turning a Profit as a Contractor* Melanie Hodgdon, Leslie C. Shiner, 2009-10 This is the book you should have bought the day you decided you could make more money running a construction company than banging nails for somebody else It provides you with the answers to those business questions that plague contractors what am I doing wrong and what's stopping me from making the money that I deserve You'll meet Mike a remodeler who thought he owned a business but actually had a low paying job Many contractors start out like Mike This book in a very simple and easy to understand way follows Mike as he learns to understand his numbers adopts new systems and creates a repeatable process for profit Every contractor should read this book It is the first and only book that makes the numbers game easy to understand but more importantly easy to incorporate into a contractor's business Bravo Shawn McCadden CR CLC CAPS award winning remodeler columnist and nationally recognized remodeling industry specialist The authors have distilled many of the mysteries of the small business person who can no longer manage the business by quick thinking and fast actions Mike Gorman CR construction industry author and speaker Contractors love a good story and that's what they get All of the basics are covered including cash flow analysis distinguishing job costs from overhead expenses and calculating mark up Sal Alfano Editorial Director Hanley Wood Business Media Melanie Hodgdon Business Systems Management Inc and Leslie Shiner MBA The ShinerGroup both manage successful consulting and coaching companies With over 40 years combined experience they help contractors better understand and improve business practices and maximize profits In 2007 they began to work on a series of joint projects that would capitalize on their combined talents This book is one product of that collaboration **Financial Management in Construction Contracting**

Andrew Ross, Peter Williams, 2013-01-29 **Financial Management in Construction Contracting** Andrew Ross Peter Williams This authoritative text provides a detailed insight into how construction companies manage their finances at both corporate and project level. It guides students and practitioners through the complexities of the financial reporting of construction projects within the constraints of accepted accounting practice. The book is written for non accountants and from a contractor's perspective and is equally relevant to subcontractors and main contractors. The authors examine the relationship between the external annual accounts and the internal cost value reconciliation process. CVR is covered in depth and the authors consider issues such as interim payments, subcontract accounts, contractual claims, final accounts, cash flow management and the reporting of the physical and financial progress of contracts. A broad perspective of all the financial aspects of contracting is taken along with related legal issues and the authors explain how things operate in the real world. They describe good practice in financial control while at the same time being honest about some of the more questionable practices that can and do happen. The approach taken is unique as the financial management of construction projects is considered from the perspective of the contractor's quantity surveyor. The book deals with the real issues that surveyors have to address when using their judgment to report turnover, profitability, cash flow and work in progress on projects and the financial problems faced by subcontractors are frankly and pragmatically explored. The payment and notice requirements of the Construction Act are explained in detail and relevant provisions of JCT2011, NEC3, ICC, DOM 1 and other standard contracts and subcontracts are also covered. **Financial Management in Construction Contracting** addresses the wide variety of external factors that influence how construction companies operate including government policy, banking covenants and the financial aspects of supply chain management. Cost reporting systems are described and real life examples are used to illustrate cost reports, accrual systems and how computerised systems can be employed to provide the QS with information that can be audited. This is the ideal core text for final year degree and post graduate students and provides an invaluable reference source for all engaged in the financial management of construction projects. This book's companion website is at www.wiley.com/go/rossfinancialmanagement and offers invaluable resources for both students and lecturers. PowerPoint slides for lectures on each chapter, Excel worksheets to practice what you learn, Sample valuations and cashflows.
