## **Construction Economics And Organization:**

SDGs in Construction Economics and Organization Göran Lindahl, Stefan Christoffer Gottlieb, 2023-05-27 This book examines how research in construction economics and organization contributes to the achievement of the SDGs Featuring selected contributions from the 11th Nordic Conference on Construction Economics and Organisation CREON 2022 held in Copenhagen Denmark and Malmö Sweden the contributions of this book explore the ways in which research in construction economics and organization assists in building resilient infrastructure fostering green innovations and contributes to sustainable economic growth Each contribution relates to one or more individual SDG and describes how the research contributes to the understanding of construction management and economics **4th Nordic Conference on Construction Economics and Organization** Brian Atkin, Jan Borghbrant, 2007 *Construction Economics and Organization* Jan Bröchner, Per-Erik Josephson, B. Larsson, 2001 10th Nordic Conference on Construction Economics and Organization Irene Lill, Emlyn Witt, Prelims The economics and business of construction Updating and cleaning out the make or buy decision in construction revisited Bispevika project research for constructing a collaborative value chain Social considerations in the procurement of road and railroad projects in Sweden Standardization and industrialized construction of special purpose building Identifying contradictions of integrating life cycle costing in design practices Advancing networking based business management in construction markets Contracts and culture in a partnering project Sub contractors perception of contracting the case of crime Project managers gatekeepers or inside men The hybridity of strategic partnerships and construction supply chain management Dynamic capabilities and risk management evaluating the cdmm model for clients An opposite design build procurement method competing on quality with a fixed price Construction and project management An appraisal of water infrastructure projects financing challenges in South Africa The soft factors in design management a hidden success factor Room to manoeuvre governing the project provisions A longitudinal view of adopting project alliancing case Finland A simulation based optimization for contractors in precast concrete projects Governed by municipal land allocations implications for housing developers Situation picture through construction information management Who benefit from crime in construction a structural analysis Quality evaluation of contractor s schedule in the bidding phase Activity cruciality as measure of network schedule structure resilience Construction programmes and programming a critical review Procurement research current state and future challenges in the Nordic countries Exploitative learning in inter organizational projects evidence from dutch infrastructure practices The transition from design bid build contracts to design build Exploring the dynamics of supplier innovation diffusion Understanding collaborative working in a facilitated interdisciplinary environment Ensuring successful knowledge transfer in building renovation projects Public private collaboration in the context of zero emission neighbourhood Strategizing and project management in construction projects an exploratory literature review Building information data and digitalization BIM

enabled education A systematic literature review A BIM enabled learning environment a conceptual framework I work all day with automation in construction I am a sociomaterial designer Developing smart services to smart campus An overview of BIM adoption in the construction industry benefits and barriers BIM for construction education initial findings from a literature review Model for smart self learning and adaptive resilience building Investigating the drop out rate from a BIM course Innovations in the construction process Senior residence concepts in Norway challenges and actions for a sustainable development 3D printing technology in construction results from a survey Product and manufacturing systems alignment a case study in the timber house building industry Opening the black box of accessibility regulation Orchestrating multi actor collaborative innovation across organizational boundaries Sustainability and resource efficiency Social sustainability in modelling of value creation in housing refurbishment Reviewing the role of sustainability professionals in construction Exploring the evolution and impact of building environment assessment methods in achieving green building Stakeholders of construction and real estate Challenging the rhetoric of construction briefing insights from a formula 1 sports venue Underlying causes for risk taking behaviour among construction workers Towards developing a framework for user driven innovation in refurbishment Reconstructing knowledge integration in the Norwegian AEC industry Institutional complexity for Chinese international contractors Built environments BIM related innovation in healthcare precinct design and facilities management Location is crucial in retrofit strategy selection in different regions Construction education and research From theoretical to practical competence on health and safety A test platform of viable methods to improve production and learning on construction sites

**Construction Economics and Organization** Lund Institute of Technology. Division of Construction Management, 2003 Proceedings of the 9th Nordic Conference on Construction Economics and Organization Martine Buser, Göran Lindahl, Christine Räisänen, **Modern Construction Economics** Gerard de Valence, 2010-11-10 Modern construction economics has a wider focus than was previously the case with stronger links to mainstream economics reflecting increasing interest in a range of theoretical issues This book brings together the essential reviews of this trend and pushes towards the development of a comprehensive theoretical framework for construction economics

**Research Companion to Construction Economics** Ofori, George, 2022-03-15 This innovative Research Companion considers the history nature and status of construction economics and its need for development as a field in order to be recognised as a distinct discipline It presents a state of the art review of construction economics identifying areas for further research

Construction Microeconomics Christian Brockmann, 2023-01-17 CONSTRUCTION MICROECONOMICS Unique and comprehensive reference describing microeconomic approaches theories and models adapted to and developed for the construction industry Construction Microeconomics provides comprehensive coverage of microeconomics applied to the construction industry focusing on construction clients who initiate construction projects and on contractors who transform the ideas and plans of clients into infrastructure and buildings With the help of microeconomic theory it tries to answer

questions about decision making by clients contractors and governments with respect to projects in the built environment It includes discussions of alternative theories to mainstream microeconomics such as new institutional economics behavioral economics and the capability approach Applications from the construction sector including land supply sustainability industrialization and lean construction are provided to ground the theory in practical construction In Construction Microeconomics readers will learn How microeconomic theory relies heavily on assumptions for modeling and the nuances of adjusting those assumptions How heterogenous contract goods affect supply and demand markets information technology and accordingly the theories of contractors and owners How interaction influences the production process and how land as a production factor changes the production function How ex ante costs determine the cost theory of the contractor and why contracting is more akin to the service sector than the goods sector Advanced undergraduate and masters students lecturers and academics in construction and related disciplines and professionals in the construction industry looking for expert analysis into a unique facet of the field will find Construction Microeconomics to be a valuable complete and authoritative reference on the subject     **Hearings, Reports and Prints of the Joint Economic Committee** United States. Congress. Joint Economic Committee,1964     *6th Nordic Conference on Construction Economics and Organisation - Shaping the Construction/Society Nexus* Kim Haugbølle,2011     *Construction Economics* Danny Myers,2016-09-22 Construction Economics provides students with the principles underlying the relationship between economic theory and the construction industry Its new approach specifically examines the problems of securing sustainable construction The new edition has been fully revised to provide an overview of the economy and construction markets since the global financial crisis As such it examines the challenges of changing government policy adapting to climate change adopting BIM and reducing costs A new introduction along with new readings data examples glossary items government strategies and references revises this established core text and brings it up to the historic EU referendum As with previous editions it retains a tried and tested format a clear and user friendly style use of a second colour for emphasis regular summaries of key points a glossary of construction economics extensive use of tables and figures extracts from Construction Management and Economics reviews of useful websites This invaluable textbook is essential reading across a wide range of disciplines from construction management and civil engineering to architecture property and surveying     *Annual Economic Indicators for the USSR* United States. Congress. Economic Joint Committee,États-Unis. Congress. Joint economic committee,1964     **The American Contractor** ,1920     *Project Life Cycle Economics* Massimo Pica,2016-03-03 The financing of modern construction projects reflects the need to address the costs and benefits of the whole life of the project This means that end of life economics can now have a far greater impact on the planning and feasibility phases During the project itself decisions on construction materials and processes all influence the schedule as well as both immediate and down the line costs Massimo Pica and his co authors explain in detail the fundamentals of project life cycle economics and how they apply in the

context of complex modern construction This is an essential guide for those involved in construction project design tendering and contracting to help ensure the sustainability of the project or their contribution to it from the start It is also important for those involved in the delivery of the project to help them make the choices to keep the project on a financial even keel Government corporations and other organizations are looking for new models of collaborative working to fund their large construction and infrastructure projects in the face of changing attitudes to risk a better educated and more demanding base of end user clients and the increasing requirements for projects that are environmentally responsible and sustainable Project Life Cycle Economics is a fundamental primer for those commissioning and those delivering construction     *Engineering and Contracting* ,1921     **Organization and Economics of Construction** Peter Thompson,1994     **Engineering & contracting ...** ,1921     **A.E.C. Bulletin** American engineering council,1924     *Building* ,1922
