Constructions Of Reason Explorations Of Kants Practical Philosophy:

Constructions of Reason Onora O'Neill, 1989 This book traces the alleged incoherences to attempts to assimilate Kant's ethical writings to modern conceptions of rationality actions and rights Kant, Duty and Moral Worth Philip Stratton-Lake, 2005-07-05 Kant Duty and Moral Worth is a fascinating and original examination of Kant's account of moral worth The complex debate at the heart of Kant's philosophy is over whether Kant said moral actions have worth only if they are carried out from duty or whether actions carried out from mixed motives can be good Philip Stratton Lake offers a unique account of acting from duty which utilizes the distinction between primary and secondary motives He maintains that the moral law should not be understood as a normative moral reason but as playing a transcendental role Thus a Kantian account of moral worth is one where the virtuous agent may be responsive to concrete particular considerations whilst preserving an essential role for universal moral principles Kant Duty and Moral Worth is a lucid examination of Kant's moral thought that will appeal to Kant scholars and anyone interested in moral theory **Kant on Practical Justification** Mark Timmons, Sorin Baiasu, 2013-03-08 This volume of new essays provides a comprehensive and structured examination of Kant's justification of norms a crucial but neglected theme in Kantian practical philosophy The essays engage with the view that a successful account of justification of normative claims has to be non metaphysical and go on to pursue further implications in ethics legal and political philosophy and philosophy of religion *Architecture or Revolution* Nadir Lahiji, 2020-09-22 By linking building theory to the emancipatory project of critique advanced by radical thinkers in our time this work investigates the key conceptual and historical elements that culminate in an emancipatory theory of building entitled Toward a philosophy of shelter Taking Marx as its only resource this work proceeds with the conviction that our era is contemporaneous to Marx's historical era This means not judging the validity of Marx from the perspective of the historical situation but rather demonstrating the validity of a Marxian perspective for a singular historical situation as ours This work will therefore translate this perspective into seeing the situation of architecture through the eyes of Marx All those concerned with the predicament in our current condition in which architecture must play a major social role in upholding the universal value of what Alain Badiou calls generic humanity will take an interest in this work In particular architects critics scholars and students inside the field of architecture who would be seeking the application of this universal value to a new theory of building will be a welcoming audience for this work **Bounds of Justice** Onora O'Neill, 2000-10-26 Argues for a concept of justice that takes account of boundaries institutions and human diversity *Ethics and Practical Reason* Garrett Cullity, Berys Gaut, 1997-11-20 These thirteen new specially written essays by a distinguished international line up of contributors including some leading contemporary moral philosophers give a rich and varied view of current work on ethics and practical reason The three main perspectives on the topic Kantian Humean and Aristotelian are all well represented The editors introduction provides a valuable introductory survey of the topic putting the individual essays in context Ethics and
