catalyst for neighborhoods Within this context the book considers numerous projects that have prompted discussion and provided fresh impetus all across Latin America Outstanding projects like the Santo Domingo Library in Medellin Colombia by Giancarlo Mazzanti Alberto Kalach s Liceo Franco Mexicano in Mexico and the works of Alejandro Aravena in Chile show that recent Latin American architecture is more than capable of holding its own beside the works of the founders Felipe Hernandez is an architect and professor of Architectural Design History and Theory at The University of Liverpool He attended an MA in Architecture and Critical Theory graduating with distinction in 1998 and received his PhD from the University of Nottingham in 2003 He has taught at the Bartlett School of Architecture UCL The Universities of Nottingham Sheffield East London and Nottingham Trent in the United Kingdom as well as at Brown University and Roger Williams University in USA Felipe has published numerous essays and articles examining the situation of contemporary Latin American cities and revealing the multiplicity of architectural practices that operate simultaneously in the constant re shaping of the continent s cities
