In this portrait of contemporary architecture in Germany well known authors in the field describe 26 buildings and projects by German architects from 1990 from 11 architectural firms It provides an overview of the most important movements in German architecture since 1975 Colonialism and Modern Architecture in Germany Itohan Osayimwese, 2017-07-19 Over the course of the nineteenth century drastic social and political changes technological innovations and exposure to non Western cultures affected Germany's built environment in profound ways The economic challenges of Germany's colonial project forced architects designing for the colonies to abandon a centuries long highly ornamental architectural style in favor of structural technologies and building materials that catered to the local contexts of its remote colonies such as prefabricated systems As German architects gathered information about the regions under their influence in Africa Asia and the Pacific during expeditions at international exhibitions and from colonial entrepreneurs and officials they published their findings in books and articles and organized lectures and exhibits that stimulated progressive architectural thinking and shaped the emerging modern language of architecture within Germany itself Offering in depth interpretations across the fields of architectural history and postcolonial studies Itohan Osayimwese considers the effects of colonialism travel and globalization on the development of modern architecture in Germany from the 1850s until the 1930s Since architectural developments in nineteenth century Germany are typically understood as crucial to the evolution of architecture worldwide

Contemporary Julia Walker, 2021-11-18 For years following reunification Berlin was the largest construction site in Europe with striking new architecture proliferating throughout the city in the 1990s and early 2000s Among the most visible and the most contested of the new projects were those designed for the national government and its related functions Berlin Contemporary explores these buildings and plans tracing their antecedents while also situating their iconic forms and influential designers within the spectacular world of global contemporary architecture Close studies of these sites including the Reichstag the Chancellery and the reconstruction of the Berlin Stadtschloss now known as the Humboldt Forum demonstrate the complexity of Berlin's political and architectural rebuilding and reveal the intricate historical negotiations that architecture was summoned to perform *The Many Faces of Modern Architecture* John Zukowsky, 1994 Such eclectic pluralism gives the lie to two widely held assumptions about modernist architecture in Germany that it was synonymous with Bauhaus style functionalism and that it came to an abrupt end with the Nazis accession to power in 1933 **Contemporary**

Contemporary Architecture Marta Tobolczyk, 2021-07-05 This book offers an exciting journey into the most recent architectural achievements seen in their complexity and plurality and described in the most objective and truthful way The development of contemporary architecture is presented as it commenced more than a century ago as it tried to reconcile democratic ideals with the forces of the Industrial Era In contrast to many books on the modern day art of building the development of architecture is not described chronologically here but rather independently for each selective architectural trend This allows a better explanation of some evolutionary processes and the continuity of each trend Thanks to such an approach this book will serve as a convenient tutorial for courses on history of contemporary architecture in all art and architectural schools
