Analytic Philosophy and the Later Wittgensteinian Tradition Paolo Tripodi, 2020-01-31 This book aims to explain the decline of the later Wittgensteinian tradition in analytic philosophy during the second half of the twentieth century Throughout the 1950s Oxford was the center of analytic philosophy and Wittgenstein the later Wittgenstein the most influential contemporary thinker within that philosophical tradition Wittgenstein's methods and ideas were widely accepted with everything seeming to point to the Wittgensteinian paradigm having a similar impact on the philosophical scenes of all English speaking countries However this was not to be the case By the 1980s albeit still important Wittgenstein was considered as a somewhat marginal thinker What occurred within the history of analytic philosophy to produce such a decline This book expertly traces the early reception of Wittgenstein in the United States the shift in the humanities to a tradition rooted in the natural sciences and the economic crisis of the mid 1970s to reveal the factors that contributed to the eventual hostility towards the later Wittgensteinian tradition

The Crisis of Philosophy Michael H. McCarthy, 1990-01-01 This book presents a sympathetic yet critical treatment of the major philosophical attempts to define a viable project for philosophy in the face of historical changes McCarthy then proposes a comprehensive critical and methodological strategy of epistemic integration that fully respects the progressive and pluralistic character of contemporary science and common sense The programs of Frege Husserl Wittgenstein Carnap Sellars Dewey Quine and Rorty are carefully presented and an assessment is made of their merits and limitations This assessment results in a defense of Lonergan's integrative strategy a nuanced philosophical strategy around which a gathering center could be built McCarthy presents Lonergan's work as containing the firm outline and partial execution of a philosophical project continuous with philosophy's historic purposes and equal to the exigences of the present The book examines a broad range of seminal topics and after extended dialectical treatment of them develops a coherent account of their interdependence These topics include psychologism intentionality the limits of naturalism semantical and epistemic realism historical belonging epistemic invariance foundational analysis the limitation of logic and of the linguistic turn generalized empirical method the interdependence of mind and language the interplay of nature and history and the critical appropriation of tradition

Philosophy Santiago Zabala, 2008-05-14 Contemporary philosopher analytic as well as continental tend to feel uneasy about Ernst Tugendhat who though he positions himself in the analytic field poses questions in the Heideggerian style Tugendhat was one of Martin Heidegger's last pupils and his least obedient pursuing a new and controversial critical technique Tugendhat took Heidegger's destruction of Being as presence and developed it in analytic philosophy more specifically in semantics Only formal semantics according to Tugendhat could answer the questions left open by Heidegger Yet in doing this Tugendhat discovered the latent hermeneutic nature of analytic philosophy its post metaphysical dimension in which there are no facts but only true propositions What Tugendhat seeks to answer is this What is the meaning of thought following the linguistic turn Because of the rift between analytic and continental philosophers very few studies have been written on Tugendhat and he has been omitted altogether from several histories of philosophy Now that these two schools have begun to reconcile Tugendhat has become an example of a philosopher who in the words of Richard Rorty built bridges between continents and between centuries Tugendhat is known more for his philosophical turn than for his phenomenological studies or for his position within analytic philosophy and this creates some confusion regarding his philosophical propensities Is Tugendhat analytic or continental Is he a follower of Wittgenstein or Heidegger Does he belong in the culture of analysis or

in that of tradition Santiago Zabala presents Tugendhat as an example of merged horizons promoting a philosophical historiography that is concerned more with dialogue and less with classification In doing so he places us squarely within a dialogic culture of the future and proves that any such labels impoverish philosophical research Contemporary Analytic Philosophy Milton Karl Munitz,1981 *Language and Reality from a Naturalistic Perspective* Andrea Bianchi,2020-10-19 This book celebrates the many important contributions to philosophy by one of the leading philosophers in the analytic field Michael Devitt It collects seventeen original essays by renowned philosophers from all over the world They all develop themes from Devitt s work thus discussing many fundamental issues in philosophy of linguistics theory of reference theory of meaning methodology and metaphysics In a long final chapter Devitt himself replies to the contributors In so doing he further elaborates his views on various of these issues for example defending his claim in opposition to Chomskyan orthodoxy that languages are external rather than internal his well known causal theory of reference his shocking idea that meanings can be causal non descriptive modes of presentation his methodological naturalism his commitment to scientific realism and his version of biological essentialism The volume will appeal to all scholars and students interested in contemporary theoretical analytic philosophy and will be a must read for any serious researcher in philosophy of language It provides a deep insight into the work of one of the most important living philosophers and will help readers to better understand language and reality from a naturalistic perspective Philosophy , *Introduction to the Philosophies of Research and Criticism in Education and the Social Sciences* James L. Paul,2005 This rigorous volume focuses on the underlying perspectives justifying the major approaches currently being used in educational research Introductory chapters lay the foundation for exploring varying research perspectives Nine specific perspectives on research post positivism pragmatism constructivism ethics and deliberate democracy criticism interpretivism race ethnicity gender arts based research and post structuralism are examined through discussions written by senior scholars known for their expertise in the perspective And a guided tour of criticism is given in which these same scholars demonstrate the use of the critical method by critiquing six studies selected as exemplars of different research approaches For education students who aspire to become researchers and for those who simply need to read and understand research literature *Introducing Analytic Philosophy* Herbert Hochberg,2003 This series provides a forum for cutting edge studies in logic and the modern philosophy of language as well as for publications in the field of analytical metaphysics **The Crisis of Method in Contemporary Analytic Philosophy** Avner Baz,2017 Avner Baz presents a critique of the working practices of analytic philosophy in recent decades He challenges the assumptions on which the philosophical method of cases rests and he presents a pragmatist conception of language on which the method of cases as used both armchair and experimental philosophers is fundamentally misguided
